other books about collections management it doesn't focus on the details of collections care but rather on the big picture of managing such a project. It assumes that at the beginning there is nothing but the reader and an unmanaged collection so that part of the project is to source money, material, and people to help. The second edition has a new chapter on setting up collections management systems; the original text was reworked and in parts enhanced; there are additional success stories in the last chapter with references to them in the text, and the bibliography now contains some resources for natural history, indigenous, and archaeological collections.
