Taking Power On The Origins Of Third World Revolutions:

Taking Power John Foran, 2005-11-17 *Taking Power* analyzes the causes behind some three dozen revolutions in the Third World between 1910 and the present. It advances a theory that seeks to integrate the political, economic, and cultural factors that brought these revolutions about and links structural theorizing with original ideas on culture and agency. It attempts to explain why so few revolutions have succeeded while so many have failed. The book is divided into chapters that treat particular sets of revolutions, including the great social revolutions of Mexico (1910), China (1949), Cuba (1959), Iran (1979), and Nicaragua (1979); the anticolonial revolutions in Algeria, Vietnam, Angola, Mozambique, and Zimbabwe from the 1940s to the 1970s; and the failed revolutionary attempts in El Salvador, Peru, and elsewhere. It closes with speculation about the future of revolutions in an age of globalization, with special attention to Chiapas, the post-September 11 world, and the global justice movement.

Revolutions and Revolutionary Movements James DeFronzo, 2018-05-04 With crucial insights and indispensable information concerning modern-day political upheavals, *Revolutions and Revolutionary Movements* provides a representative cross-section of the most significant revolutions of the twentieth and twenty-first centuries. This Fifth Edition is revised and updated with a new chapter on the Arab Revolution from its beginning in December 2010 to the present. In this widely used text, students can trace the historical development of eleven revolutions using a five-factor analytical framework. Author James DeFronzo clearly explains all relevant concepts and events, the roles of key leaders, and the interrelation of each revolutionary movement with international economic and political developments and conflicts, including World Wars I and II, the Cold War, and the War on Terror. Student resources include multiple orienting maps, summary and analysis sections, suggested readings, chronologies, and documentary resources.

In this Handbook, historians and scholars of international relations examine the past and present of the intersection between history and IR, as well as looking to the future by laying out new questions and directions for research. Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world. This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires. Instead, the revolutions of this century have several new characteristics which call for a renewed analysis of the subject. This handbook offers a comparative perspective on the new wave of revolutions of the last decade, presenting case studies on the color revolutions, the Arab revolutions of 2010-2011, and the global wave of revolutions in 2013-2018 that spanned regions ranging from Africa to the Caucasus. It offers a better understanding of the varied forms, features, and historical backgrounds of revolutions, as well as

their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra
