Cultural Memory in the Icelandic Contemporary Sagas Lucie Korecká, 2025-02-17 The objective of this book is to analyse the Old Icelandic sagas dealing with the twelfth to fourteenth centuries the secular contemporary sagas and the bishops sagas from the perspective of cultural memory studies This approach foregrounds their function as sources of the late medieval Icelanders collective identity shaped by the narrative tradition and the current concerns It is argued here that the intertextual relations between the Old Icelandic historiographical texts extend beyond the literary level and influence the perception of the past itself The accounts of events from the settlement to the fourteenth century form a coherent narrative that acknowledges the historical development but accentuates the themes and values that continued to define the collective identity Within this framework the book presents a detailed analysis of how this function of the narrative shaped the sagas depicting the time when Iceland was gradually integrated into the Norwegian kingdom As such it contributes to a more nuanced understanding of how this culturally significant period of medieval Icelandic history was perceived when the memory of it was still crossing the boundary between common knowledge and foundational history
