Making Software Andy Oram, Greg Wilson, 2010-10-14 Many claims are made about how certain tools technologies and practices improve software development. But which claims are verifiable and which are merely wishful thinking? In this book, leading thinkers such as Steve McConnell, Barry Boehm, and Barbara Kitchenham offer essays that uncover the truth and unmask myths commonly held among the software development community. Their insights may surprise you. Are some programmers really ten times more productive than others? Does writing tests first help you develop better code faster? Can code metrics predict the number of bugs in a piece of software? Do design patterns actually make better software? What effect does personality have on pair programming? What matters more: how far apart people are geographically or how far apart they are in the org chart? Contributors include Jorge Aranda, Tom Ball, Victor R. Basili, Andrew Begel, Christian Bird, Barry Boehm, Marcelo Cataldo, Steven Clarke, Jason Cohen, Robert DeLine, Madeline Diep, Hakan Erdogan, Michael Godfrey, Mark Guzdial, Jo E. Hannay, Ahmed E. Hassan, Israel Herraiz, Kim Sebastian, Herzig, Cory Kapser, Barbara Kitchenham, Andrew Ko, Lucas Layman, Steve McConnell, Tim Menzies, Gail Murphy, Nachi Nagappan, Thomas J. The Integration Debate Chester Hartman, Gregory Squires, 2009-09-11 Racial integration and policies intended to achieve greater integration continue to generate controversy in the United States with some of the most heated debates taking place among long-standing advocates of racial equality. This book explores both long-standing and emerging controversies over the nation's ongoing struggles with discrimination and segregation. More urgently, it offers guidance on how these barriers can be overcome to achieve truly balanced and integrated living patterns.
