**The Problem of Social Inequality** Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future. Currently upwards of 80% of people's life chances are determined by factors over which they have absolutely no control. Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions. How can we get out of the traps we have created for ourselves? We need to reboot capitalism. Drawing on diverse examples from a range of countries, McNall explains the social, economic, and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future.

**A University Education** David Willetts, 2017-11-17 Universities have a crucial role in the modern world. In England, entrance to universities is by nationwide competition, which means English universities have an exceptional influence on schools. A striking theme of the book is this important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In *A University Education*, David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries, especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful account of the value of higher education and the case for more expansion. He covers

controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework *Journal of the Senate, State of Florida* Florida.
