Economics March Question Paper 2014 Grade 11:

Monetary Policy after the Great Recession Arkadiusz Sieroń, 2020-11-09 Walter Bagehot noticed once that John Bull can stand many things but he cannot stand two per cent Well for several years he has had to stand interest rates well below that in some countries even below zero However despite this sacrifice the economic recovery from the Great Recession has been disappointingly weak This book's aim is to answer this question The central thesis of the book is that the standard understanding of the monetary transmission mechanism is flawed That understanding adopts erroneous assumptions such as that low interest rates always stimulate economic growth by boosting the credit supply investment and consumption and does not fully take into account several unintended channels of monetary policy such as risk taking high level of debt or zombification of the economy In other words the effectiveness of monetary policy is limited during economic downturns accompanied by the debt overhang and the balance sheet recession and generates negative effects which can make the policy counterproductive The author provides a thorough analysis of the issues related to the interest rates in the conduct of monetary policy such as the risk taking channel of monetary policy the portfolio balance channel and the wealth effect zombie firms in the economy the misallocation of resources as well as the neutral interest rate targeting and the difference between the neutral and natural interest rate and the negative interest rate policy The book is written in an accessible and engaging manner and will be a valuable resource for scholars of monetary economics as well as readers interested in unconventional monetary policy

India's Approach to Border Management Pushpita Das, 2022-12-29 This book attempts to provide a comprehensive understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders The book argues that persistence of various cross border threats and challenges and an absence of robust intra regional trade among its neighbouring countries forced India to employ a security centric and unilateral approach to border management with emphasis on hardening the borders to cross border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats Besides discussing the threats and challenges that India faces along the borders the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces building of physical and electronic fences the establishment of modern facilities for smoothening legitimate cross border travel the development of the border areas through special programmes and increasing trade and connectivity as well as other cooperative bilateral mechanisms Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

The Environment Index ,1987 **Why States Recover**
Greg Mills,2015-01-03 State failure takes many forms Somalia offers one extreme The country s prolonged civil war led to the collapse of central authority with state control devolving to warlord led factions that competed for the spoils of local commerce political power and international aid Malawi on the other hand is at the other end of the scale During President Bingu s second term in office the country s economy collapsed as a result of poor policies and Bingu s brand of personal politics On the surface Malawi s economy seemed largely stable underneath however the polity was fractured and the economy broken In between these two extremes of state failure are all manner of examples many of which Mills explores in the fascinating and profoundly personal *Why States Recover* Throughout he returns to his key questions how do countries recover What roles should both insiders and outsiders play to aid that process Drawing on research in more than thirty countries and incorporating interviews with a dozen leaders Mills examines state failure and identifies instances of recovery in Latin America Asia and Africa For anyone interested in the reasons behind states failure and remedies to ensure future economic stability it is important reading
