## **Stochastic Interacting Systems:**

**Stochastic Interacting Systems: Contact, Voter and Exclusion Processes** Thomas M. Liggett, 1999-08-13

Interactive particle systems is a branch of probability theory with close connections to mathematical physics and mathematical biology. This book takes three of the most important models in the area and traces advances in our understanding of them since 1985. It explains and develops many of the most useful techniques in the field. *Interacting Particle Systems* Thomas M. Liggett, 2006-01-09. From the reviews: This book presents a complete treatment of a new class of random processes which have been studied intensively during the last fifteen years. None of this material has ever appeared in book form before. The high quality of this work makes a fascinating subject and its open problem as accessible as possible. F. L. Spitzer in Mathematical Reviews 1986. However, it can be said that the author has succeeded in what even experts are seldom able to achieve: To write a clearcut and inspiring book on his favorite subject which meets most if not all requirements which can be imposed on a comprehensive text on an important new field. The author can be congratulated on his excellent presentation of the theory of interacting particle systems. The book is highly recommended to everyone who works on or is interested in this subject to probabilists, physicists and theoretical biologists. G. Rosenkranz in Methods of Information in Medicine 1986. *Stochastic Interacting Systems in Life and Social Sciences* Nicolas Lanchier, 2024-07. This volume provides an overview of two of the most important examples of interacting particle systems: the contact process and the voter model, as well as their many variants introduced in the past 50 years. These stochastic processes are organized by domains of application: epidemiology, population dynamics, ecology, genetics, sociology, econophysics, game theory, along with a flavor of the mathematical techniques developed for their analysis.

## **Interactive Systems: Design, Specification, and**

**Verification** Chris J. Johnson, 2003-06-30. This book constitutes the thoroughly refereed post-proceedings of the 8th International Workshop on the Design Specification and Verification of Interactive Systems (DSV IS 2001) held in Glasgow, Scotland, UK in June 2001. The 12 revised full papers presented have gone through two rounds of reviewing, selection and revision. The book offers topical sections on mobile interface design, context sensitive interfaces, supervision and control systems, temporal and stochastic issues and new perspectives.
