The Otherworlds of Liz Jensen Helen Esther Mundler,2016 The first study of one of the most innovative of contemporary novelists Liz Jensen and of the otherworlds in her fiction Liz Jensen a British author of eight novels is among today s most innovative writers Her literary thrillers occupy the terrain between realism and science fiction This first study of Jensen centers on the very diverse otherworlds she creates in each of her novels which can consist of an indeterminate space of ontological instability a zone in which real and unreal converge to destabilize the realist text as in Egg Dancing 1995 and TheNinth Life of Louis Drax 2004 In other novels the otherworld relies on defamiliarization thus in War Crimes for the Home 2002 the experience of war is transformed by being seen from a woman s perspective In stillother cases the otherworld spans the novel s entire topos as in The Paper Eater 2000 the full blown utopia at the center of Jensen s oeuvre Jensen s work approaches contemporary social issues such as religious fundamentalism ecological disaster and assisted procreation Simultaneously it displays a number of characteristics of erudite fiction including self reflexivity inter and intratextual reference parody pastiche and burlesque Notwithstanding the popular elements of Jensen s work Helen E Mundler s study adopts a rigorously academic approach to it referencing canonical works but also more innovative texts particularly by contemporary women writers as points of comparison Helen E Mundler is Senior Lecturer in English Studies at UPEC Universit Paris Est Cr teil with a research affiliation at the Universit Paris X Nanterre La D fense

Feminist in a Software Lab Tara McPherson,2018-02-19 For

over a dozen years the Vectors Lab has experimented with digital scholarship through its online publication Vectors and through Scalar a multimedia authoring platform The history of this software lab intersects a much longer tale about computation in the humanities as well as tensions about the role of theory in related projects Tara McPherson considers debates around the role of cultural theory within the digital humanities and addresses Gary Hall s claim that the goals of

critical theory and of quantitative or computational analysis may be irreconcilable or at the very least require far more time and care She then asks what it might mean to design from conception digital tools and applications that emerge from contextual concerns of cultural theory and in particular from a feminist concern for difference This path leads back to the Vectors Lab and its ongoing efforts at the intersection of theory and praxis
