**Stormwater Discharge Management** Frank R. Spellman, Joanne E. Drinan, 2003-03-01 This comprehensive resource provides engineers managers compliance specialists construction professionals and students with the tool they need to understand and comply with the requirements of the Code of Federal Regulations CFR Title 40 Part 122 stormwater regulations. Stormwater Discharge Management covers the full spectrum of stormwater issues including stormwater regulations NPDES permitting minimum control measures activities based discharges overflows stormwater monitoring stormwater enforcement strategy and the new Stormwater Phase II Rule which mandated compliance March 10 2003. Readers will learn who meets the criteria for compliance under this rule and how compliance can be achieved in construction activity agricultural activity and marine activity. To help simplify the process the authors identify each and every compliance requirement from examining the different types of stormwater discharge permits to writing an effective Stormwater Pollution Prevention Plan SWPP. They also include actual EPA field enforcement practices and best management practices to help readers ensure compliance success. Readers will gain a clearer appreciation for the stormwater regulations by reviewing the objectives of the Clean Water Act the purpose and requirements of the National Pollutant Discharge Elimination System NPDES and the types of discharges facilities affected by the laws

## **Stormwater Management for Transportation**

**Facilities** Shaw L. Yu, 1993 This synthesis will be of interest to highway design engineers maintenance engineers environmental personnel administrators and others responsible for the design operation and maintenance of stormwater management for highways and ancillary facilities. Information is presented on the basic hydrology needed to assess stormwater impacts and on the effectiveness of stormwater management techniques. Designers of highway facilities must consider stormwater management requirements within the context of both localized runoff impacts as well as downstream effects of runoff. This report of the Transportation Research Board describes the management of both stormwater quantity and stormwater quality. Stormwater quantity includes an overview of methods of estimating runoff and management control practices. Stormwater quality management includes discussions of the most prevalent pollutants and best management practices BMP to minimize pollutants from transportation facilities. Various types of structural and non structural methods are described including their design considerations and efficiencies. Several stormwater management models are described with special concern for highway applications. Highlights from the 1990 National Pollutant Discharge Elimination System NPDES permits are presented
