The Alor-Pantar languages Marian Klamer, 2014-09-17 The Alor Pantar family constitutes the westernmost outlier group of Papuan Non Austronesian languages Its twenty or so languages are spoken on the islands of Alor and Pantar located just north of Timor in eastern Indonesia Together with the Papuan languages of Timor they make up the Timor Alor Pantar family The languages average 5 000 speakers and are under pressure from the local Malay variety as well as the national language Indonesian This volume studies the internal and external linguistic history of this interesting group and showcases some of its unique typological

features such as the preference to index the transitive patient like argument on the verb but not the agent like one the extreme variety in morphological alignment patterns the use of plural number words the existence of quinary numeral systems the elaborate spatial deictic systems involving an elevation component and the great variation exhibited in their kinship systems Unlike many other Papuan languages Alor Pantar languages do not exhibit clause chaining do not have switch reference systems never suffix subject indexes to verbs do not mark gender but do encode clusivity in their pronominal systems Indeed apart from a broadly similar head final syntactic profile there is little else that the Alor Pantar languages share with Papuan languages spoken in other regions While all of them show some traces of contact with Austronesian languages in general borrowing from Austronesian has not been intense and contact with Malay and Indonesian is a relatively recent phenomenon in most of the Alor Pantar region
