The Campaign:

The Campaign of Waterloo John Codman Ropes, 1892

Senators on the Campaign Trail Richard F. Fenno, 1998-02-01

This is a book about the politics of representative democracy written from the perspective of the politicians who make it work. Typically political scientists study campaigns from the perspective of the voter and for the purpose of explaining election outcomes. But campaigns also need to be studied from the perspective of the candidate for the purpose of understanding representation. Richard F. Fenno Jr. traveled with ten U.S. senators as they campaigned in their home states using what he calls the drop in drop out tag along hang around method of research to present a developmental picture of their activities. His focus here is on three such activities: pursuing a career, campaigning for office, and building constituency connections. Taken together, the three constitute the political underpinnings of representative democracy. Fenno describes the achievement, the testing, and the maintenance of representational relationships. He examines challengers and incumbents, winners and losers, and motivations, strategies, and behaviors, and he reports on differences, similarities, and patterns among them. In studying the candidates' varied careers, campaigns, and connections in stages and sequences and in depth, and in allowing us to hear them reflect on these experiences, Fenno has been able to offer rare insights into campaigns and elections, insights very different from conventional ones that concentrate on the behavior of voters. In its focus on the process of representative democracy, *Senators on the Campaign Trail* offers a rich, rounded, developmental view of some high-level individuals who work at the business of representation. For scholars, the book suggests some qualitative confirmation and added stimulation in forging generalizations about politicians. For citizens, the book argues for replacing the conventional blanket condemnation of our politicians so prevalent today with more discriminating judgments about what they do and why and to what purpose they do it.

The Tale of the Campaign of Igor, 1973

Campaigns and Elections Stephen K. Medvic, 2021-11-29

Stephen K. Medvic's *Campaigns and Elections* is a comprehensive yet compact core text that addresses two distinct but related aspects of American electoral democracy: the processes that constitute campaigns and elections and the players who are involved. In addition to balanced coverage of process and actors, it gives equal billing to both campaigns and elections and covers contests for legislative and executive positions at the national, state, and local levels, including issue-oriented campaigns of note. The book opens by providing students with the conceptual distinctions between what happens in an election and the campaigning that precedes it. Significant attention is devoted to setting up the context for these campaigns and elections by covering the rules of the game in the American electoral system as well as aspects of election administration and the funding of elections. Then the book systematically covers the actors at every level: candidates and their organizations, parties, interest groups, the media, and voters, and the macro-level aspects of campaigns such as campaign strategy and determinants of election outcomes. The book concludes with a big picture assessment of campaign ethics and implications of the permanent campaign. New to the Fourth Edition: Fully updated through the 2020 elections, looking ahead to the 2022 midterms. Covers

the impact of the COVID 19 pandemic on the 2020 election as well as the January 6 2021 insurrection at the US Capitol Adds new sections in Chapter 3 on election integrity and the assessment of election administration Reviews recent Supreme Court cases on gerrymandering and faithless electors Expands coverage of social media as a source of news of the increasingly partisan nature of the media and of the role of media fact checking in campaigns and elections Reorganizes the chapters on the various actors so that the chapter on candidates leads directly to the chapter on campaigns Fully updates the resources listed at the end of each chapter

Campaigns Inc. Cayce Myers, 2025-06-26 Set against the changing and turbulent politics of California from the 1930s through the 1950s Campaigns Inc Leone Baxter Clem Whitaker and the Invention of Political Consulting examines the life and work of Leone Baxter and her husband Clem Whitaker During this era Baxter and Whitaker invented and refined the field of campaign consulting a form of public relations practice that manages reputation image and communication during a political campaign This book details their work and the development of their successful political consulting firm Campaigns Inc They worked for mainly conservative and Republican clients and it was through this work that Campaigns Inc set the standard for how campaigns would be structured and run through the next century The book begins with an overview of Baxter and Whitaker s core philosophy of communication campaigns and politics Cayce Myers details their early work in California s Central Valley and their first big campaign against Democratic nominee Upton Sinclair who ran for California Governor in 1934 The book then examines Baxter and Whitaker s campaign for the successful 1942 Gubernatorial candidacy of Earl Warren The Warren campaign served as a template for building a campaign around a candidate and not a party Following that election Baxter and Whitaker s work transformed to focus on defeating compulsory health insurance reforms They successfully defeated healthcare reform initiatives by California Governor Earl Warren and later President Harry Truman by shaping public sentiment against the specter of socialized medicine

Targeting Uplift René Michel, Igor Schnakenburg, Tobias von Martens, 2019-09-09 This book explores all relevant aspects of net scoring also known as uplift modeling a data mining approach used to analyze and predict the effects of a given treatment on a desired target variable for an individual observation After discussing modern net score modeling methods data preparation and the assessment of uplift models the book investigates software implementations and real world scenarios Focusing on the application of theoretical results and on practical issues of uplift modeling it also includes a dedicated chapter on software solutions in SAS R Spectrum Miner and KNIME which compares the respective tools This book also presents the applications of net scoring in various contexts e g medical treatment with a special emphasis on direct marketing and corresponding business cases The target audience primarily includes data scientists especially researchers and practitioners in predictive modeling and scoring mainly but not exclusively in the marketing context
