Corke, 2003 For senior level Aerospace Engineering students dealing with the conceptual design of aircraft The approach of this book is to demonstrate how theoretical aspects drawn from topics on airplane aerodynamics aircraft structures stability and control propulsion and compressible flows can be applied to produce a new conceptual aircraft design The book cites theoretical expressions wherever possible but also stresses the interplay of different aspects of the design which often require compromises      *Design of Field Joint for STS 51-L* P. K. Raju, Chetan S. Sankar, 2000      **Fundamentals of Aircraft and Airship Design** Leland Malcolm Nicolai, Grant Carichner, 2010 The aircraft is only a transport mechanism for the payload and all design decisions must consider payload first Simply stated the aircraft is a dust cover Fundamentals of Aircraft and Airship Design Volume 1 Aircraft Design emphasizes that the science and art of the aircraft design process is a compromise and that there is no right answer however there is always a best answer based on existing requirements and available technologies      *Modern Control Systems* Richard C. Dorf, Robert H. Bishop, 2008 Written to be equally useful for all engineering disciplines this book is organized around the concept of control systems theory as it has been developed in the frequency and time domains It provides coverage of classical control employing root locus design frequency and response design using Bode and Nyquist plots It also covers modern control methods based on state variable models including pole placement design techniques with full state feedback controllers and full state observers The book covers several important topics including robust control systems and system sensitivity state variable models controllability and observability computer control systems internal model control robust PID controllers and computer aided design and analysis For all types of engineers who are interested in a solid introduction to control systems      *Integrating Practice, Theory, and Design for Engineers* P.
