Uncovering Student Ideas in Life Science Page Keeley, 2011 Author Page Keeley continues to provide K 12 teachers with her highly usable and popular formula for uncovering and addressing the preconceptions that students bring to the classroom the formative assessment probe in this first book devoted exclusively to life science in her Uncovering Student Ideas in Science series In this volume Keeley addresses the topics of life and its diversity structure and function life processes and needs of living things ecosystems and change reproduction life cycles and heredity and human biology Using the probes as diagnostic tools that identify and analyze students preconceptions teachers can easily move students from where they are in their current thinking to where they need to be to achieve scientific understanding At the same time use of the probes deepens the teacher's understanding of the subject matter suggests instructional implications and expands assessment literacy Using the student learning data gained through the probes to inform teaching and learning is what makes the probes formative Each probe is supported by extensive Teacher Notes which provide background information on the purpose of the probes related concepts explanations of the life science ideas being taught related ideas in the national science standards research on typical student misconceptions in life science and suggestions for instruction and assessment

Calculus for the Life Sciences: A Modeling Approach James L. Cornette, Ralph A. Ackerman, 2019-05-25 Calculus for the Life Sciences is an entire reimagining of the standard calculus sequence with the needs of life science students as the fundamental organizing principle Those needs according to the National Academy of Science include the mathematical concepts of change modeling equilibria and stability structure of a system interactions among components data and measurement visualization and algorithms This book addresses in a deep and significant way every concept on that list The book begins with a primer on modeling in the biological realm and biological modeling is the theme and frame for the entire book The authors build models of bacterial growth light penetration through a column of water and dynamics of a colony of mold in the first few pages In each case there is actual data that needs fitting In the case of the mold colony that data is a set of photographs of the colony growing on a ruled sheet of graph paper and the students need to make their own approximations Fundamental questions about the nature of mathematical modeling trying to approximate a real world phenomenon with an equation are all laid out for the students to wrestle with The authors have produced a beautifully written introduction to the uses of mathematics in the life sciences The exposition is crystalline the problems are overwhelmingly from biology and interesting and rich and the emphasis on modeling is pervasive An instructor's manual for this title is available electronically to those instructors who have adopted the textbook for classroom use Please send email to textbooks@ams.org for more information Online question content and interactive step by step tutorials are available for this title in WebAssign WebAssign is a leading provider of online instructional tools for both faculty and students Energy Research Abstracts, 1990 *Research Handbook on Intellectual Property and the Life Sciences* Duncan Matthews, Herbert

Zech,2017-06-30 Intellectual property IP is a key component of the life sciences one of the most dynamic and innovative fields of technology today At the same time the relationship between IP and the life sciences raises new public policy dilemmas The Research Handbook on Intellectual Property and the Life Sciences comprises contributions by leading experts from academia and industry to provide in depth analyses of key topics including pharmaceuticals diagnostics and genes plant innovations stem cells the role of competition law and access to medicines The Research Handbook focuses on the relationship between IP and the life sciences in Europe and the United States complemented by country specific case studies on Australia Brazil China India Japan Kenya South Africa and Thailand to provide a truly international perspective
