Social Shaping Of Technology:

The Social Shaping of Technology Donald A. MacKenzie, Judy Wajcman, 1999 Technological change is often seen as something that follows its own logic something we may welcome or about which we may protest but which we are unable to alter fundamentally This reader challenges that assumption and its distinguished contributors demonstrate that technology is affected at a fundamental level by the social context in which it develops General arguments are introduced about the relation of technology to society and different types of technology are examined the technology of production domestic and reproductive technology and military technology The book draws on authors from Karl Marx to Cynthia Cockburn to show that production technology is shaped by social relations in the workplace It moves on to the technologies of the household and biological reproduction which are topics that male dominated social science has tended to ignore or trivialise though these are actually of crucial significance where powerful shaping factors are at work normally unnoticed The final section asks what shapes the most frightening technology of all the technology of weaponry especially nuclear weapons The editors argue that social scientists have devoted disproportionate attention to the effects of technology on society and tended to ignore the more fundamental question of what shapes technology in the first place They have drawn both on established work in the history and sociology of technology and on newer feminist perspectives to show just how important and fruitful it is to try to answer that deeper question The first edition of this reader published in 1985 had a considerable influence on thinking about the relationship between technology and society This second edition has been thoroughly revised and expanded to take into account new research and the emergence of new theoretical perspectives

The Social Construction of Technological Systems Wiebe E. Bijker, Thomas Parke Hughes, Trevor J. Pinch, Trevor Pinch, 1989 The impact of technology on society is clear and unmistakeable The influence of society on technology is more subtle The 13 essays in this book have been written by a diverse group of scholars united by a common interest in creating a new field the sociology of technology They draw on a wide array of case studies from cooking stoves to missile systems from 15th century Portugal to today s Al labs to outline an original research program based on a synthesis of ideas from the social studies of science and the history of technology Together they affirm the need for a study of technology that gives equal weight to technical social economic and political questions Back cover *Social Shaping Theory as a Derivative of Technological Determinism* Arghya Ray, 2013-09-23 Scientific Essay from the year 2010 in the subject Sociology Economy and Industry grade A language English abstract Technological determinism or TD can be described as a reductionist framework that can be used to explore the interrelations between humans and scientific technologies However several scholars like Dosi 1982 preferred to develop a broader perspective on technological determinism on the basis of more intricate analysis of technology change and innovation management According to the scholars like Mackenzie and Wajcman 1999 a major drawback of technological determinism is its rigidity which is resulted by the deterministic nature of this theory Such an approach as advocated by its early proponents like Thorstein Veblen restricts is suppleness to explain the complex attributes of different social processes especially in relationship with innovation management Tilman 2004 [American Libraries and the Internet: The Social Construction of Web Appropriation and Use](#) Bin Li, 2007 **Handbook of Research on Social Dimensions of Semantic Technologies and Web Services** Cruz-Cunha, Maria Manuela, Oliveira, Eva F., Tavares, Antonio J., Ferreira, Luis G., 2009-05-31 This book discusses the new technologies of semantic Web transforming the way we use information and knowledge Provided by publisher *Technologies & Society* Ron Westrum, 1991 The shaping of people and things Theory Marx s theory of technology The Ogburn generation Recent theoretical approaches Originators and managers of technology Inventors and inventions Invention as a social process The role of designers in

Understanding Information Communication Technologies and Society Ibrahim Rufai, 2014 Several theoretical perspectives i.e. Technological Determinism Socio Technical System Actor Network Theory Structuration Theory Social Shaping Theory Social Presence Theory Social Constructivism Theory Instrumental Theory and Substantive Theory underpin existing studies and discourse by scholars and development experts in the field of communication technologies and development to aid our understanding of the relationship between technology and society However most of such debates and empirical studies about the influence of technology on socio economic change are often framed by Technological Determinism Social Shaping perspective on the other hand attempts to address what seems to be a major drawback in the technological determinism thinking an apparent oversight neglect of social factors implications in its analysis but fails to clearly acknowledge the valid argument of technological determinism Likewise Socio Technical System seems to suggest a much deeper understanding of the relationship between technology and society by providing a convincing perspective of a more symbiotic and proportionate interaction between technology and social forces but restricts its conceptualisation of social forces to human agency within an organisation This article critically examines the technological determinism social shaping and socio technical system perspectives in particular in the context of their contributions to deepening our understanding of the role of technology in society It acknowledges their contributions to development debate but argues that each only gives a partial inadequate

account of a more symbiotic relationship between technology and society Therefore this study suggests a modification to the social shaping perspective to reflect a balanced two way mutually influencing relationship between technology and society It is believed the modification would make the theory more robust improve its applicability to different situations whilst also deepening our understanding of the relationship between technology communication technologies and society

Creative Technological Change Ian Mcloughlin,2002-03-11 Creative Technological Change draws upon a wide range of thinking from organisational theory innovation studies and the sociology of technology It explores the different ways in which these questions have been framed and answered especially in relation to new virtual technologies The idea of metaphor is used to capture the differences between and strengths and weaknesses of various ways of conceptualising the technology organisation relationship This approach offers the possibility of developing new ways of thinking about viewing and ultimately responding creatively to the organisational challenges posed by technological change
