

Is it possible to be completely Objective ?

- Subjective elements means- The elements of human intervention
- For human being its tough to be neutral in thought and action
- That is the crux of the problem of objectivity
- There must be a hidden influenced or inevitable subjective quality which can not be entirely suppressed.
- So minimize the subjectivity and maximize the objectivity in social science research is also an objective (like objectives of research)

Hinkle,2020-07-26 Based on a comparative study of the theories of such sociologists as Ward Sumner Keller Giddings Ross Small and Cooley this is a systematic and rigorous

analysis of the main features of earlier sociological theory in the USA The author identifies and characterizes the basic assumptions of early American sociological thought in terms of an abstract analytical scheme He shows that early theory focused on social ontological interests the pervasive ontological stance being evolutionary naturalism within which the problems of social origins and social change tended to be paramount He also points out that some sociologists preferred a social process theory In his final chapter the author suggests the degree of similarity and dissimilarity of continuity and discontinuity between earlier and later theory in American sociology and provides a basis for explaining and interpreting the character of the prevalent assumptions of one period in American theory in relation to other periods
