## **Social Theory And The Global Environment:**

**Social Theory and the Global Environment** Ted Benton, Michael Redclift, 2013-01-11 This book marks a watershed in the social sciences. The qualitative critical perspective of sociology and allied disciplines challenges the technocentric managerialism which dominates environmental policy, its discourse and its impact. The authors explore the relationship between social theory and sustainability in an attempt to transcend technical rhetoric and embrace a broader understanding of nature. *Social Theory and the Environment* David Goldblatt, 2013-05-28 This book establishes whether contemporary social theory can help us understand the structural origins of environmental degradation and environmental politics.

*Sociological Theory and the Environment* Riley E. Dunlap, 2002 Nearly all of the major perspectives, focal points and debates in environmental sociology are reflected in this collection of essays. The volume exceeds the bounds of conventional theory by surveying societies and their natural biophysical environments.

**Risk and Social Theory in Environmental Management** Thomas Measham, Stewart Lockie, 2012-05-09 Risk and Social Theory in Environmental Management marks a timely contribution given that environmental management is no longer just about protecting pristine ecosystems and endangered species from anthropogenic harm; it is about calculating and managing the risks to human communities of rapid environmental and technological change. Firstly, the book provides a solid foundation of the social theory underpinning the nature of risk, then presents a rethinking of key concepts and methods in order to take more seriously the biophysical embeddedness of human society. Secondly, it presents a rich set of case studies from Australia and around the world, drawing on the latest applied research conducted by leading research institutions. In so doing, the book identifies the tensions that arise from decision making over risk and uncertainty in a contested policy environment and provides crucial insights for addressing on-ground problems in an integrated way.

**Contesting Governance in the Global Marketplace** Jason Hall McNichol, 2002 **Biodiversity and Human Welfare** Piers M. Blaikie, Sally Jeanrenaud, United Nations Research Institute for Social Development, 1996 *The Dark Side of the Left* Richard J. Ellis, 1998 Political correctness idealizing the oppressed and an affinity for authoritarian and charismatic leaders are all parts of what Ellis calls the dark side of the left.

**Global Environmental Politics** Ronnie D. Lipschutz, 2004 Solutions to environmental problems must be the products of concession, negotiation and inevitable compromise. This work argues that much light can be shed on global environmental problems from their very roots. Throughout, it uses cases to illustrate the effects of globalization and capitalism. **Proceedings of the Regional Conference on Gender Issues in Community-Based Natural Resource Management, CBNRM**, 1998

**Institutional Interaction in Global Environmental Governance** Sebastian Oberthür, Thomas Gehring, 2006 The first large-scale systematic investigation of how interaction among international institutions affects global environmental governance, with a conceptual framework and ten case studies. **Technonatures** Damian F. White, Chris

Wilbert, 2009-05-19 International contributors map the political ecologies of our technonatural present and indicate possible

paths for technonatural futures      **Ecofeminism as Politics** Ariel Salleh,1997-11 This book explores the philosophical and political challenge of ecofeminism It shows how the ecology movement has been held back by conceptual confusion over the implications of gender difference while much that passes in the name of feminism is actually an obstacle to ecological change and global democracy The author argues that ecofeminism reaches beyond contemporary social movements being a political synthesis of four revolutions in one ecology is feminism is socialism is post colonial struggle Informed by a critical postmodern reading of the Marxist tradition Salleh s ecofeminism integrates discourses on science the body culture nature political economy The book opens with a short history of the ecofeminism Part two establishes the basis for its epistemological challenge while the third part consists of ecofeminist deconstructions of deep ecology social ecology eco socialism and postmodern feminism In the final section Salleh suggests that a powerful way forward can be found in commonalities between ecofeminist and indigenous struggles      **Social Dimensions of Contemporary Environmental Issues** P. Ester,Wolfgang Schluchter,1996 Provides a comprehensive insight into the way social scientists contemplate environmental problems both in terms of perceived causes and solutions      *Perspectives on the Environment 2* Interdisciplinary Research Network on Environment and Society,1995 The essays in this book have been selected from papers presented to the 2nd conference of the Interdisciplinary Research Network on the Environment and Society IRNES held in Sheffield in September 1993 Page 5      [The Finnish Research Programme on Climate Change](#) Jaana Roos,1996 **Proceedings of the ... Conference** New Zealand Geographical Society. Conference,New Zealand Geographical Society,2001      **Canadian Journal of Environmental Education** ,1997      **Governing Environmental Flows** Gert Spaargaren,A. P. J. Mol,Frederick H. Buttel,2006 Lays the foundations for a new conceptualization of global environmental governance that draws on the flow perspective found in recent work in sociology      **Social Challenges for the Mekong Region** Mingsan Khāosa'āt,John Dore,2003      *Antipode* ,2002
