Sociocultural Theory The Genesis Of Second Language Development:

Sociocultural Theory and the Genesis of Second Language Development James Lantolf, Steven L. Thorne, 2006-03-02

Integrates theory research and practice on the learning of second and foreign languages as informed by sociocultural and activity theory. It familiarizes students, teachers, and other researchers who do not work within the theory with its principal claims and constructs in particular as they relate to second language research. The book also describes and illustrates the use of activity theory to support practical and conceptual innovations in second language education.

The New Handbook of Second Language Acquisition William C. Ritchie, Tej K. Bhatia, 2009

The New Handbook of Second Language Acquisition is a thoroughly revised and reorganized and re-worked edition of Ritchie and Bhatia's 1996 handbook. The work is divided into six parts, each devoted to a different aspect of the study of SLA. Part I includes a recent history of methods used in SLA research and an overview of currently used methods. Part II contains chapters on Universal Grammar, emergentism, variationism, information processing, sociocultural, and cognitive linguistics. Part III is devoted to overviews of SLA research on lexicon, morphosyntax, phonology, pragmatics, sentence processing, and the distinction between implicit and explicit knowledge. Part IV examines neuropsychology of SLA, another on child SLA, and the effects of age on second language acquisition and use. Part V is concerned with the contribution of the linguistic environment to SLA, including work on acquisition in different environments through the Internet and by deaf learners. Finally, Part VI treats social factors in SLA, including research on acquisition in contact circumstances, on social identity in SLA, on individual differences in SLA, and on the final state of SLA bilingualism.

The Routledge Handbook of Second Language Acquisition and Pragmatics Naoko Taguchi, 2019-01-30

The Routledge Handbook of Second Language Acquisition and Pragmatics is a comprehensive critical survey of the field of L2 pragmatics, collecting a number of chapters that highlight the key theories, methods, pedagogies, and research findings throughout its development over the last four decades. Demonstrating the ways in which pragmatics has long served as a lens through which to examine patterns of L2 development, the volume is divided into six parts, which reflect the field's structure and evolution. Constructs and units of analysis; Theoretical approaches; Methodological approaches; Pedagogical approaches; Contexts and individual considerations; L2 pragmatics in the global era. The handbook has a particular focus on covering not only traditional topics in the field such as constructs of pragmatic competence (e.g. speech acts, implicature, teaching and assessment) and pragmatics learning in a study abroad program, but also emerging areas of study including interactional pragmatics, intercultural pragmatics, usage-based approaches, corpus linguistics, and psycholinguistic experimentation. Each chapter introduces the topic and follows with a description of its theoretical underpinnings, an overview of existing literature, an appraisal of current practice, concluding with a discussion of future directions for research and key readings. The Routledge Handbook of Second Language Acquisition and Pragmatics is an essential resource for those with an interest in second

L2 Dynamic

Assessment Research in China Matthew E. Poehner, James P. Lantolf, 2025-06-24 Dynamic Assessment is an innovative approach to revealing the full range of learner abilities that has rapidly gained attention from language educators and researchers. While much of the research to date has examined Dynamic Assessment in Western countries, the research in this book further extends the framework by documenting its uses by Chinese scholars in meeting context specific challenges. Dynamic Assessment or DA originated in the writings of Russian psychologist L S Vygotsky concerning the concept of the Zone of Proximal Development. While many assessment approaches call for closer integration with teaching, DA embeds an instructional component referred to as mediation as part of the assessment procedure. Following Vygotsky, the picture of a person's abilities is incomplete if focus is restricted to past development as diagnosed by what the person can achieve independently and without considering those abilities that are emerging as revealed through responsiveness to mediation. In this way, DA offers insights into learner abilities not easily obtained through other assessments. Widely employed in special education and general abilities testing, the second language field has witnessed a rapid growth of interest in using DA to better understand the full range of learner language abilities and to determine how instruction can optimally promote the development of all learners. This book brings together a collection of original studies conducted by scholars in China that build upon methods and principles from previous DA research and that leverage them to meet local demands. In so doing, this research collectively illustrates the extension of DA into new cultural contexts while simultaneously yielding findings that are sure to resonate with language educators, assessors, and researchers around the world. This book was originally published as a special issue of *Language Assessment Quarterly*.

A Study of the Effects of Foreign Language Theater Sakae

Fujita, 2008 **Sociocultural Theory and Second Language Developmental Education** Matthew E. Poehner, James P. Lantolf, 2024-06-06 Sociocultural Theory (SCT) as formulated by Russian psychologist L S Vygotsky nearly a century ago is distinct among traditions in the field of second language (L2) studies in its commitment to praxis. According to this view, theory and research provide the orienting basis for practice which in turn serves as a testing ground for theory (Vygotsky 1997). This Element offers a synthesis of foundational concepts and principles of SCT and an overview of two important areas of praxis in L2 education: Concept Based Language Instruction which organizes language curricula around linguistic concepts and Dynamic Assessment, a framework that integrates teaching and diagnosing learner L2 abilities. Leading approaches to L2 teacher education informed by SCT are also discussed. Examples from studies with L2 teachers and learners showcase praxis in action and emerging questions and directions are considered
