Youth Social Anxiety and Phobia Sandeep Krishnamurthy, 2025-02-20 Youth Social Anxiety and Phobia is a comprehensive guide that delves into the complex world of social anxiety disorders among young individuals. We focus on understanding intervention and support providing a holistic exploration of the challenges faced by youth dealing with social anxiety and phobia. Our book begins by distinguishing between social anxiety and social phobia offering clear definitions and diagnostic criteria. We delve into the developmental aspects highlighting how social anxiety manifests differently from childhood to adolescence. We place significant emphasis on evidence based interventions and treatment modalities outlining cognitive behavioral techniques exposure therapies social skills training and mindfulness practices. These tools support mental health professionals educators and caregivers in effectively helping youth. Interwoven with case studies and personal narratives our book offers real life examples of individuals navigating social anxiety and phobia. We also address the broader societal context discussing stigma peer dynamics school environments and family influences on social anxiety. We advocate for creating inclusive supportive spaces that promote mental well being and empower young individuals to manage their anxiety and thrive socially. Youth Social Anxiety and Phobia bridges the gap between research and practical applications making it an essential guide for mental health professionals educators parents and youth navigating these conditions.

Internet Use and Psychological Well-Being Among Children and Adolescents Yangu Pan, Zhaojun Teng, Daniel Tan Lei Shek, Chun Chen, 2024-01-22 Internet use e.g. smartphone use social media use is ubiquitous in our daily lives and plays an increasingly important role in human well being. Today's adolescents and their parents spend significant amounts of time on technological devices such as smartphones especially during COVID-19. In this year new research shows that nearly half of American teenagers say they use the Internet almost constantly 95% of American teens have smartphones and about 54% of teens said it would be somewhat hard to give up social media. Hence further research on the relationship between Internet use and psychological well being among children and adolescents is worth pursuing. At the same time a new interest in this area of research is parental technoference which was defined as regular interruptions to real time face to face communications interactions or time spent together among family members because of parental use of technology. Technoference has become a common phenomenon in many families with children and evidence has been identified that extended parental time on technological devices e.g. smartphones could have negative effects on parent child relationships and children's well being. For example parental phubbing is regarded as a typical parental technoference and this term is used widely in some countries around the world which has been demonstrated to be detrimental to their children's developmental outcomes and cause various psychological health problems.
