Social Mindscapes:

Social Mindscapes Eviatar Zerubavel, 1999-10-15 Cognitive science addresses cognition on two levels individual and universal To fill the gap between the Romantic vision of the solitary thinker and the cognitive psychological view revolving around a search for universal foundations of cognition Zerubavel charts a social realm of mind one focused on conventional normative aspects of thinking

Social Mindscapes Eviatar Zerubavel, 1999-10-15 Why do we eat sardines but never goldfish ducks but never parrots Why does adding cheese make a hamburger a cheeseburger whereas adding ketchup does not make it a ketchupburger By the same token how do we determine which things said at a meeting should be included in the minutes and which ought to be considered off the record and officially disregarded In this wide ranging and provocative book Eviatar Zerubavel argues that cognitive science cannot answer these questions since it addresses cognition on only two levels the individual and the universal To fill the gap between the Romantic vision of the solitary thinker whose thoughts are the product of unique experience and the cognitive psychological view which revolves around the search for the universal foundations of human cognition Zerubavel charts an expansive social realm of mind a domain that focuses on the conventional normative aspects of the way we think With witty anecdote and revealing analogy Zerubavel illuminates the social foundation of mental actions such as perceiving attending classifying remembering assigning meaning and reckoning the time What takes place inside our heads he reminds us is deeply affected by our social environments which are typically groups that are larger than the individual yet considerably smaller than the human race Thus we develop a nonuniversal software for thinking as Americans or Chinese lawyers or teachers Catholics or Jews Baby Boomers or Gen Xers Zerubavel explores the fascinating ways in which thought communities carve up and classify reality assign meanings and perceive things defamiliarizing in the process many taken for granted assumptions

Defining All-Israel in Chronicles Louis C. Jonker, 2016-05-17 In this book Louis C Jonker considers more sophisticated and nuanced

models for applying the heuristic lens of identity in the interpretation of the Hebrew Bible book of Chronicles Not only does he investigate the potential and limitations of different sociological models for this purpose but the author also provides a more nuanced analysis of the socio historical context of origin of late Persian period biblical literature by distinguishing between four levels of socio historic existence in this period It is shown that varying power relations were in operation on these different levels which contributed to a multi levelled process of identity negotiation Louis C Jonker shows the value of the chosen methodological approach in his analysis of Chronicles but also suggests that it holds potential for the investigation of other Hebrew Bible corpora
