 den Butter, André Nijssen, Jacopo Torriti, 2012-09-14 The premise of this volume is that business regulations are expected to
 grow in the near future as a consequence of the emergence of a world risk society Risks related to terrorism climate change
 and financial crises for example will penetrate all conditions of life Increasingly the decisions and actions of some bring about
 risks for many in this era of globalization Controlling these risks implies managing the world through high quality regulation
 with a particular emphasis on businesses and financial institutions Central to this approach is the argument that a major if
 not the primary aim of regulation is to internalize externalities or in a broader context to repair market failure Such repair
 can only be accomplished when the costs are smaller than the welfare gains Featuring contributions from researchers and
 policy analysts from the fields of economics management law sociology political science and environmental policy this book
 focuses on three major topics Social risks and business regulation Preconditions for better business regulation Theoretical
 issues related to better business regulation Collectively the authors demonstrate that the easier it is for regulated businesses
 to comply at the lowest costs possible without jeopardizing the related public goals the greater the degree of compliance
 When successful the net result is a balance of individual and collective net benefits and by further implication sustainable
 business practice and economic growth **The Multifaith Movement: Global Risks and Cosmopolitan Solutions** Anna
 Halafoff, 2012-10-29 This book documents the ultramodern rise of the multifaith movement as multifaith initiatives have been
 increasingly deployed as cosmopolitan solutions to counter global risks such as terrorism and climate change at the turn of
 the 21st century These projects aim to enhance common security particularly in Western societies following the events of
 September 11 2001 and the July 2005 London bombings where multifaith engagement has been promoted as a strategy to
 counter violent extremism The author draws on interviews with 56 leading figures in the field of multifaith relations including
 Paul Knitter Eboo Patel Marcus Braybrooke Katherine Marshall John Voll and Krista Tippett Identifying the principle aims of
 the multifaith movement the analysis explores the benefits and challenges of multifaith engagement as well as the
 effectiveness of multifaith initiatives in countering the process of radicalization Building on notions of cosmopolitanism
 the work proposes a new theoretical framework termed Netpeace which recognizes the interconnectedness of global
 problems and their solutions In doing so it acknowledges the capacity of multi actor peacebuilding networks including
 religious and state actors to address the pressing dilemmas of our times The primary intention of the book is to assist in the
 formation of new models of activism and governance founded on a politics of understanding modeled by the multifaith
