Iterations Of Differential Operators:

Iterations of Differential Operators A. V. Babin, 1989 Translated from the Russian by H Zahavi Topics covered include the activity of linear and nonlinear differential operators the related theories of functions and operators and the connections between the theory of functions and partial differential equations The author focuses on new methods of constructing solutions for partial differential equations and looks at research into the smoothness of these solutions Formulae theorems and lemmas are numbered independently for quick reference and the detailed listing of the subjects covered in each chapter enables the reader to find a particular area of interest without difficulty Annotation copyrighted by Book News Inc Portland OR

Author Iterative Methods for Nonlinear Operator Equations in Banach Spaces Shih-sen Chang, Yeol Je Cho, Haiyue Zhou, 2002 Since Banach's fixed point theorem was proved by Banach in 1922 many authors have used this theorem to show the existence and uniqueness of solutions for differential and integral equations a system of simultaneous linear algebraic equations by methods of successive approximations etc and have extended generalised and improved this theorem in several ways The purpose of this book is to give a comprehensive introduction to the study of iterative approximation methods for solutions of nonlinear equations involving some kinds of nonlinear mappings and multi valued mappings in Banach spaces and normed linear spaces by the Mann and Ishikawa iterative sequences with errors and mixed errors and the generalised steepest descent approximations Philosophical Transactions of the Royal Society Royal Society, 1898 **Iterative Solution of Matrix Equations for Symmetric Matrices Possessing Positive and Negative Eigenvalues** Richard Roy Roloff, 1979
