Excerpt from *An Introduction to the History of Science* The history of science has something to offer to the humblest intelligence It is a means of imparting a knowledge of scientific facts and principles to unschooled minds At the same time it affords a simple method of school instruction Those who understand a business or an institution best as a contemporary writer on finance remarks are those who have made it or grown up with it and the next best thing is to know how it has grown up and then watch or take part in its actual working Generally speaking we know best what we know in its origins The history of science is an aid in scientific research It places the student in the current of scientific thought and gives him a clue to the purpose and necessity of the theories he is required to master It presents science as the constant pursuit of truth rather than the formulation of truth long since revealed it shows science as progressive rather than fixed dynamic rather than static a growth to which each may contribute It does not paralyze the self activity of youth by the record of an infallible past It is only by teaching the sciences in their historical development that the schools can be true to the two principles of modern education that the sciences should occupy the foremost place in the curriculum and that the individual mind in its evolution should rehearse the history of civilization About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
