heart disease are on the rise everywhere on earth This is a book about the good the terrible and the avocado toast A riveting exploration of the hidden forces behind what we eat The Way We Eat Now explains how this food revolution has transformed our bodies our social lives and the world we live in *The Food Revolution In The Soviet Union And Eastern Europe* Robert Deutsch,2019-07-11 The first study in the Western world to compare the relationship between food and politics in the countries of Eastern Europe this book views the current food revolution as part of the modernization process Robert Deutsch argues that the communist leaders in the Comecon countries increasingly link political stability and preservation of power to the problem of satisfying consumer demand He also assesses the various social forces that have brought about the food revolution The most important is the expanded working class which is no longer willing to defer consumer demands to a hypothetical communist future The CMEA countries thus face the dilemma of either gradually liberalizing their economies in order to meet growing consumer demands or resorting to repression Neither of these options promises a long term solution for implementing economic policies prescribed by Marxist Leninist doctrine Robert Deutsch presents case studies of Hungary Bulgaria and the German Democratic Republic as examples of the relative success of economic reforms To a greater or lesser extent these countries have opted for economic decentralization by liberalizing private ownership and pricing policy and by integrating planning with market oriented concepts The author compares this with the economic problems of the Soviet Union Poland Romania and Czechoslovakia The study is enhanced by an exhaustive bibliography arranged topically and drawn from the specialized literature in several languages **The Food Revolution** Verner Wheelock,1986 Abstract Changes in the food industry and the demands of consumers for healthier products are examined Concerns are on the relationship between diet and diseases such as heart attacks and cancer Such trends in consumer demands affect farmers manufacturers and retailers Other topics covered are Developing policies of the U S and other countries 2 Setting dietary goals for Britain 3 Achieving dietary goals via local food policies food industry media promotional material and nutritional labeling and 4 Implications of the food revolution on the retailers manufacturers and the producing sectors of industry
