Police Administration Gary W. Cordner, Kathryn E. Scarborough, 2010-05-26 This text examines police administration from multiple perspectives: a systems perspective emphasizing the interrelatedness among units and organizations; a traditional structural perspective; administrative principles, management functions, and the importance of written guidelines; a human behavioral perspective; the human element in organizations; and a strategic management perspective. Communications and information systems, performance evaluation, strategies and tactics, and prevailing and promising approaches to increasing effectiveness of police agencies. Coverage of management functions and organizational principles is streamlined while providing a stronger emphasis on diversity principles and on developing police agencies as learning organizations. A concluding chapter covers contemporary issues including community engagement, collaboration, globalization, racial profiling, mass media, cyber crime, terrorism, and homeland security. Chapters enhanced with learning objectives, discussion questions, and boxes including information such as the Standards for Law Enforcement Agencies. Case studies with discussion questions provide opportunities for the reader to review real world situations.

Policing Gangs and Youth Violence Scott H. Decker, 2003 This title is part of The Wadsworth Professionalism in Policing Series, edited by Samuel Walker. This reader is a descriptive presentation of current practices within policing and juvenile justice, focusing on gangs that utilize the community policing model. By looking at specific strategies and their efficacy, the authors attempt to combat a major perceived problem with community policing: that the methodology of community policing can be subjective and nebulous, using ill-defined and misinterpreted practices.

This book shows what is working for agencies across the country and how these best practices can be employed
