Text Vol 13 An Interdisciplinary Annual Of Textual Studies:

Shakespeare as Literary Dramatist Lukas Erne, 2003-03-13 In this 2003 study Lukas Erne argues that Shakespeare apart from being a playwright who wrote theatrical texts for the stage was also a literary dramatist who produced reading texts for the page. The usual distinction that has been set up between Ben Jonson on the one hand carefully preparing his manuscripts for publication and Shakespeare the man of the theatre writing for his actors and audience indifferent to his plays as literature is questioned in this book. Examining the evidence from early published playbooks Erne argues that Shakespeare wrote many of his plays with a readership in mind and that these literary texts would have been abridged for the stage because they were too long for performance. The variant early texts of *Romeo and Juliet*, *Henry V* and *Hamlet* are shown to reveal important insights into the different media for which Shakespeare designed his plays. Breaking the Book Laura

Mandell, 2015-05-14 *Breaking the Book* is a manifesto on the cognitive consequences and emotional effects of human interactions with physical books that reveals why the traditional humanities disciplines are resistant to digital humanities. Explores the reasons why the traditional humanities disciplines are resistant to digital humanities. Reveals facets of book history offering it as an example of how different media shape our modes of thinking and feeling. Gathers together the most important book history and literary criticism concerning the hundred years leading up to the early 19th century emergence of mass print culture. Predicts effects of the digital revolution on disciplinary expertise and the institutional restructuring of the humanities. **The Shakespearean Archive** Alan Galey, 2014-10-23 Why is Shakespeare so often associated with

information technologies and with the idea of archiving itself? Alan Galey explores this question through the entwined histories of Shakespearean texts and archival technologies over the past four centuries. In chapters dealing with the archive, the book photography, sound, information and data, Galey analyzes how Shakespeare became prototypical material for publishing experiments and new media projects as well as for theories of archiving and computing. Analyzing examples of the Shakespearean archive from the seventeenth century to today, he takes an original approach to Shakespeare and new media that will be of interest to scholars of the digital humanities, Shakespeare studies, archives and media history. Rejecting the idea that current forms of computing are the result of technical forces beyond the scope of humanist inquiry, this book instead offers a critical prehistory of digitization read through the afterlives of Shakespeare's texts.
