

DEFINITION OF TERRORISM BY COUNTRY IN OECD COUNTRIES

There have been some definitional differences in the use of the terms "terrorism" and "act of terrorism" between OECD countries. It is for this reason that a comparison is necessary to clarify the scope of the operation of the terrorism risk insurance programmes.

The OECD International Platform on Terrorism Risk Insurance shares information and identifies good practices for the financial management of terrorism risk, to contribute to fast economic recovery in the event of attacks.

This comparative table is regularly updated. It is the product of joint work between national terrorism insurance schemes, the OECD and the World Forum of Catastrophe Programmes.

the Effectiveness of Terrorism Risk Financing Solutions Howard Kunreuther,Erwann Michel-Kerjan,2007 The 9/11 attacks in the United States as well as other attacks in different parts of the world raise important questions related to the economic impact of terrorism What are the most effective ways for a country to recover from these economic losses Who should pay for the costs of future large scale attacks To address these two questions we propose five principles to evaluate alternative programs We first discuss how a federal insurance program with mandatory coverage and a laissez faire free market approach for providing private insurance will fare relative to these principles We conclude that neither solution is likely to be feasible here in the United States given the millions of firms at risk and the current structure of insurance regulation We then evaluate how well the U.S. Terrorism Risk Insurance Act (TRIA) a public private program to cover commercial enterprises against foreign terrorism on U.S. soil meets the five principles In particular we show that TRIA has had a positive effect on availability of terrorism coverage and also has significantly contributed to reducing insurance premiums TRIA is scheduled to terminate at the end of the year but pending legislation would extend the program for fifteen years after December 31 (HR 2761) In this paper we show that such a long term extension might have important impacts on the market This could increase the take up rate as prices might be even lower than they are today We show also however that if TRIA were extended for a long period of time in its current form some insurers could game the program by collecting ex ante a large amount of premiums for terrorism insurance while being financially responsible for only a small portion of the claims ex post The general taxpayer and the general commercial policyholder whether or not covered against terrorism would absorb the residual insured losses This raises major equity issues inherent in the design of the program **BNA's Banking Report** ,2004 **The OECD Observer** Organisation for Economic Co-operation and Development,2006 **Policy Issues in Insurance Reforming the Insurance Market in Russia** Mark Douglas Mariska,Thomas B. Manson,Organisation for

Economic Co-operation and Development,2005-11-29 This book presents an in depth historical and analytical review of the reform process in the Russian insurance sector The report examines the state of the Russian insurance industry analyses market dynamics and structure and assesses the major reform initiatives that have occurred in the sector over the past years Of crucial importance in the reform process was the revision of the organisational structure of the Russian insurance business improvement of solvency and capitalization requirements for insurance companies liberalization of the market and enhancement of supervisory oversight with the establishment of the Federal Service for Insurance Supervision The report concludes with a series of policy recommendations for policymakers and insurance market players They are designed to further improve the legal and regulatory framework and to strengthen the insurance industry management structure operational mechanisms and competitive capacity *Journal of Applied Corporate Finance* ,2006 Catastrophic Risks and Insurance ,2005 This volume is the eighth of a series devoted to major policy issues in insurance and sets out the proceedings of a conference held in Paris in November 2004 to discuss options for dealing with losses caused by large scale disasters It contains a selection of papers and reports which focus on three key issues the insurability of catastrophic risks the extent to which financial markets can help address the risks of both natural disasters and terrorism and the role of governments and public private partnerships in the management of such risks *The OECD Observer* ,2006 **Journal of Economic Literature** ,2007 *Vierteljahrsshefte zur Wirtschaftsforschung* Deutsches Institut für Wirtschaftsforschung,2009

Business Periodicals Index ,2003 *The Journal of Economic Perspectives* ,2004 This journal attempts to fill a gap between the general interest press and other academic economics journals Its articles relate to active lines of economics research economic analysis of public policy issues state of the art economic thinking and directions for future research It also aims to provide material for classroom use and to address issues relating to the economics profession PAIS International in Print Catherine Korvin,2003-05 This book contains bibliographic references with abstracts and subject headings to public and social policy literature and to world politics published in print and electronic formats international focus Financial Market Trends ,2004
