Surrealism and Architecture Thomas Mical, 2005 Twenty one essays examining the relationship of surrealist thought to architectural theory and practice *Surrealism and architecture* Thomas Mical, Warped Space Anthony Vidler, 2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture **The Routledge Companion to Criticality in Art, Architecture, and Design** Chris Brisbin, Myra Thiessen, 2018-10-03 The Routledge Companion to Criticality in Art Architecture and Design presents an in depth exploration of criticism and criticality in theory and practice across the disciplines of art architecture and design Professional criticism is a vital part of understanding the cultural significance of designed objects and environments that we engage with on a daily basis yet there is evidence to show that this practice is changing This edited volume investigates how practitioners researchers educators and professionals engage with think about and value the practice of critique With contributions from a multi disciplinary authorship from nine countries the UK USA Australia India Netherlands Switzerland South Africa Belgium and Denmark this companion provides a wide range of leading perspectives evaluating the landscape of criticality and how it is being shaped by technological and social advances Illustrated with over 60 black and white images and structured into five sections The Routledge Companion to Criticality in Art Architecture and Design is a comprehensive volume for researchers educators and students exploring the changing role of criticism through interdisciplinary perspectives Deconstructive Surrealism William Quellec, 2014-08-12 William Quellec is an artist with an incredible unique

vision He has been photographing for the past ten years as he passed through some cities and countries and then migrated to some others Now a citizen of the United States and residing in New York he generally describes his work as a connection to landscapes and cityscapes In the latter case for example it is the architectural elements of a structure and their interactions with light shadow and their environmental surroundings that invite him to have a profound long term relationship with it He then spends time sometimes minutes sometimes hours sometimes multiple visits at different times seasons and trips to photograph the same structure and satisfy his thirst for the curiosity created by the architecture He works his surrealist photographs in specific steps The first is called Deconstruction This is the beginning of a process that starts in the field while he envisions a surrealistic form of a structure in his imagination and then for the image in his mind to become reality in the form of visual art he takes hundred of photographs The second step of his process that he calls Reconstruction happens in his studio where he takes his many photographs frame by frame placing each shot into a new dimension of art Consequently this process created by William has been named Deconstructive Surrealism and can take as little as hours and as long as years for some of his art pieces to finish Amazingly it is during this process that he might commit to his relationship with the structure on a deeper level
