## **The Historical Method:**

*The Historical Method of Herodotus* Donald Lateiner, 1989-01-01 Herodotus was the first writer in the West to conceive the value of creating a record of the recent past. He found a way to co-ordinate the often conflicting data of history, ethnology, and culture. The Historical Method of Herodotus explores the intellectual habits and the literary principles of this pioneer writer of prose. Donald Lateiner argues against the perception that Herodotus' work seems amorphous and ill-organized; that the Histories contain their own definition of historical significance. He examines patterns of presentation and literary structure in narratives, speeches, and direct communications to the reader in short: the conventions and rhetoric of history as Herodotus created it. This rhetoric includes the use of recurring themes, the relation of speech to reported actions, indications of doubt, stylistic idiosyncrasies, frequent reference to nonverbal behaviours, and strategies of opening and ending. Lateiner shows how Herodotus sometimes suppresses information on principle and sometimes compels the reader to choose among contending versions of events. His inventories of Herodotus' methods allow the reader to focus on typical practice, not misleading exception. In his analysis of the structuring concepts of the Histories, Lateiner scrutinizes Herodotean time and chronology. He considers the historian's admiration for ethnic freedom and autonomy, the rule of law, and the positive values of conflict. Despite these apparent biases, he argues, the text's intellectual and moral preferences present a generally cool and detached account from which an authorial personality rarely emerges. The Historical Method of Herodotus illuminates the idiosyncrasies and ambitious nature of a major text in classics and the Western tradition and touches on aspects of historiography, ancient history, rhetoric, and the history of ideas. *A Guide to Historical Method* Robert Jones Shafer, 1969

New Narratives for Old Anthony Briggman, Ellen Scully, 2022-06-17 Guilds and conferences have grown up around historical theology, yet no volume has ever been dedicated to the definition and illustration of the method undergirding historical theology. This volume both defines and illustrates the methodology of historical theology, especially as it relates to the study of early Christianity and situates historical theology among other methodological approaches to early Christianity, including confessional apologetics, constructive theology, and socio-cultural history. Historical theology as a discipline stands in contrast to these other approaches to the study of early Christianity. In contrast to systematic or constructive approaches, it remains essentially historical, with a desire to elucidate the past rather than speak to the present. In contrast to socio-historical approaches, it remains essentially theological, with a concern to value and understand the full complexity of the abstract thought world that stands behind the textual tradition of early Christian theology. Moreover, historical theology is characterized by the methodological presupposition that unless good reason exists to think otherwise, the theological accounts of the ancient church articulate the genuine beliefs of their authors. The significance of this volume lies in the methodological definition it offers. The strength of this volume lies in the fact that its definition of the historical method of studying theology is not the work of a single mind but that of over twenty respected scholars, many of whom are leaders in

the field The volume begins with an introductory essay that orients readers to various approaches to early Christian literature it moves to two technical essays that define the historical method of studying early Christian theology and then it illustrates the practice of this method with more than twenty essays that cover a period stretching from the first century to the dawn of the seventh

**History** G. J. Renier, 2016-04-14 This treatise of historical methodology originally published in 1950 is based upon a liberal conception of history which excludes no narrator of past events from the ranks of historians It defines history as the accurate story which preserves the memory of the past experiences of human societies The function of history determines its method and provides the answer to the question how secure is our knowledge of the past In the author's view history is empirical and its results are for ever provisional The relative merits of dogmatism and scepticism are examined and several interpretations among English historians are scrutinized
