Flynn, Klaus D. Timmerhaus, 1966 *Physics Briefs*, 1993

Superconducting Electron-Optic Devices I. Dietrich, 2012-12-06 Electron optics involves the influence of electric and magnetic fields on electron beams In those electron optical instruments utilizing magnetic fields a replacement of the conventional i.e. nonsuperconducting electron optical parts is worth considering if the outstanding magnetic properties of superconductors can improve the systems However the use of superconductors demands complicated cryogenic techniques and this of course dampens enthusiasm There are fields however where there are extreme requirements on the optical systems namely electron microscopy and high energy physics The great advantage of the combination of electron optics and superconductivity in these domains has been demonstrated in recent experiments This monograph is mainly concerned with electron microscopy Superconductivity in high energy electron optics is treated only briefly in Appendix A since the author is little acquainted with the details of the projects Furthermore the number of experiments as yet carried out is small In Appendix B electron microscope studies of basic superconductor phenomena are reviewed This material is included even though it is only slightly connected with the main topic of the book since a breakthrough in this field may be possible by the application of superconducting lenses Superconducting and Related Oxides, Physics and Nanoengineering, 1998

Advances in Superconductivity VIII Hisao Hayakawa, 1996 INIS Reference Series, 1992 *Superconducting Devices* William S. Goree, Edgar A. Edelsack, 1967 This bibliography of the literature of superconducting devices and related research covers most extensively the period from 1959 to March 1967 and contains approximately 1 000 entries representing English and foreign language publications About 300 entries are on specific superconducting devices Some 150 United States patents are also listed So many references were available relating solely to superconducting magnets and computer elements that the listing of these was restricted
