**The Global Human Resource Management Casebook** Liza Castro Christiansen, Michal Biron, Pawan Budhwar, Brian Harney, 2023-09-12 The third edition of The Global Human Resource Management Casebook provides a wide range of international teaching cases exploring contemporary human resource management (HRM) challenges. Each case focuses primarily on one country and illustrates a critical HRM issue confronting managers and HRM practitioners. This real world application provides students of HRM with a unique opportunity to examine how key HRM theories and ideas translate into practice. The case studies emphasize the national and cultural contexts of HRM, providing readers with a global understanding of HRM practices like recruitment, reward systems, diversity, and inclusion, as well as recent developments including the impact of the COVID 19 pandemic, remote working, sustainability, and digital transformation. In this edition, the editors and authors have made significant updates to reflect recent developments in the field and cover a broader range of countries. The authors also delve into new industries including consulting, energy, healthcare, IT, and education. With 31 international cases followed by further reading and learning resources, this extensive collection is an invaluable resource for any student seeking to explore contemporary HRM on a global basis.

**Human and Organizational Factors in Nuclear Safety** Gregory Rolina, 2013-08-30 This book discusses the specifics of safety regulations regarding nuclear risk and how experts contribute to the safety of nuclear installations. Drawing on research conducted in collaboration with the French Institute for Radiological Protection and Nuclear Safety (IRSN), the ideas that are put forward rely on a review of the practices of specialists in human and organizational factors concerning nuclear safety. The author shows that the French approach depends on maintaining a technical dialogue between the regulatory authority (ASN/IRSN) and nuclear operators. This method of risk management is known as 'French cooking' in the Anglo-Saxon world, where a more formal regulatory approach is taken. This technical dialogue does however hold certain benefits, particularly in the field of human and organizational factors, where it allows an advancement of the state of knowledge which remains incomplete. After the Fukushima accident in the face of an ongoing European and global re-evaluation of the safety of nuclear power and alignment towards the Anglo-Saxon standard, the French cooking approach may yet be able to make a significant contribution. This work will be of interest to all involved in nuclear power engineering and in the field of risk management and nuclear safety. Includes a preface by Jacques Repussard, Director General IRSN France and a postface by Erik Hollnagel, Professor Institute of Regional Health Research, University of Southern Denmark, Chief Consultant Centre for Quality Region of Southern Denmark.
