Surgical Anatomy Of The Temporal Bone:

Surgical Anatomy of the Temporal Bone ,1992

Surgical Anatomy of the Temporal Bone James A. Donald,1992

Since 1967 Anson and Donaldson's *Surgical Anatomy of the Temporal Bone* has been the gold standard reference in its field. Now in collaboration with Drs Duckert Lambert and Rubel, all preeminent leaders in otolaryngology head and neck surgery, Dr Donaldson has further refined this classic text atlas to make it even more useful for study reference and presurgical review. An invaluable new feature of the Fourth Edition is a step by step dissection guide that details all temporal bone dissection techniques and improves the reader's understanding of three dimensional temporal bone relationships. The Fourth Edition also achieves a better balance between developmental and adult anatomy and provides more thorough coverage of anatomy related to neurotology and base of skull surgery. Over 400 meticulously accurate detailed drawings from dissected temporal bones by two talented medical artists, George Buckley and Kate Sweeney, depict the intricacies of the temporal bone.

The Temporal Bone Mario Sanna,2006 The anatomy of the temporal bone is one of the most complicated areas in the human body. The vital structures, the three dimensional relationships involved and the fact that these structures are hidden within bony canals make the anatomy difficult to grasp. Described as a dream come true by the authors, Professor Sanna and his colleagues have devoted a major effort to creating this book to serve as a guide for young trainees wanting to learn more about temporal bone dissection. It provides comprehensive high quality full color pictures of the detailed steps of all the major surgical approaches that can be performed in the temporal bone, supplemented by images of cadaveric dissections as an aid to understanding the intracranial anatomy when indicated by the approach. Dr Sanna is part of The Gruppo Otologico, a world renowned specialist center for the diagnosis and medical and surgical treatment of diseases of the ear, skull base, facial nerve, head and neck and paranasal sinuses. More information is available on the group's website www.gruppootologico.it/eng.
