*Surgical Operations With Local Anesthesia (Classic Reprint)* Arthur E. Hertzler, 2015-08-04 Excerpt from *Surgical Operations With Local Anesthesia* In the first edition of this little book I had in mind the needs of the general practitioner in the role of an occasional operator In harmony with this plan the simpler operations alone were described confining myself to those operations which any one should be able to do with certainty without a great amount of experience in the use of local anesthetics Contrary to my expectations many surgeons of standing expressed an interest in the work and made the suggestion that its scope be widened to meet the need of surgeons In conformity with this wish the present work takes in most of the major operations In acceding to the demands of a wider scope I have not departed from the original plan of presenting to the reader a multitude of detail which seeks to arm the operator with a broad range of procedure which makes it possible to select that which is best for the given condition and patient In order to attain this aim it has been necessary to outline the entire course of the operation in many instances This is necessary for in but few procedures is any technic absolutely certain in the hands of all classes of operators For instance the skilled operator in a hernia operation is able to block off the nerve supply with certainty before the operation is begun The less experienced will find that in the course of the operation some detail has failed to work out according to schedule It becomes necessary to supplement his preliminary injections This book attempts to tell the operator just how to help himself out in these little perplexities The literature bearing on local anesthesia has been collected with diligence and has played an important part in the development in the procedures as here set forth and I gladly acknowledge my indebtedness The operations as presented however are the result of my own experience and I stand sponsor for their efficiency if performed as advised For this reason the literature has been specifically cited only in instances where the procedure is as yet not fully satisfactory About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art

technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
