Schulte, 2018-02-13 What we think about radically affects us body soul and spirit Contrary to popular belief circumstances do not determine our mood Instead our thoughts feelings and behaviors flow from our interpretations of events In the mind we give meaning to troubling events and that meaning causes us emotional pain and turmoil Philippians 4 8 challenges us to think about what is true right pure and excellent but it is not simply a charge to think positively How we think actually changes how we respond to crises and difficult situations Drawing on her experience as a clinical psychotherapist and a trauma survivor Rita Schulte gives a prescription for better health and well being that combines faith and science Through a strong connection to God mindfulness techniques and target exercises you can change toxic thinking patterns and rewire your brain to achieve optimum mental and physical health Under the Moon Kristi O'Toole, 2011-10-11 They say love is a vampires greatest weakness The old adage Hell hath no fury like a woman scorned rings true in this tale of love betrayal and death Helene is pregnant alone and mourning the tragic death of her beloved brother Relocating cross country the rural part of Ilwaco Washington becomes her safe refuge It is where she hopes to stay and start anew then Ciaran O Rourke enters the picture Helene never planned on finding the man of her dreams in O Rourke Discovering his dark secret that he was really a vampire

A Pluralist's Guide to Solving Molyneux's Problem Brian Glenney, 2024-12-31 This book presents a novel pluralist strategy for answering Molyneux's 300 year old conundrum Would a person born blind but given sight identify a shape previously known only by their touch The author interweaves historical scholarship with contemporary philosophical work and empirical research on animal infant and adult human perception The author argues that we need a new approach to Molyneux's problem because we do not know what the problem is really about and it is untestable because a Molyneux subject cannot be physically realized He criticizes Molyneux's question for its simplistic taxonomy of the blind that groups significant individual differences into a singular ontology Research in the cognitive sciences confirms that various kinds of blindness can co occur such as ocular cortical and psychological blindness Therefore the author adopts an explanatory pluralism for answering Molyneux's problem which includes no yes and no answer answers according to the domain of inquiry being used This account provides a research based answer to a long standing problem using previously unheeded insights particularly from animal crossmodal perception studies to retell a more complex story of perception its levels of explanation and integration

A Pluralist's Guide to Solving Molyneux's Problem will be of interest to researchers and advanced students working in comparative psychology epistemology history of philosophy philosophy of perception

Intellectual Properties and the Protection of Fictional Characters Dorothy J. Howell, 1990-07-30 In this pioneering volume Howell addresses the extent to which fictional characters are legally recognized and protected as intellectual property Through a judicious selection of cases chosen for their bearing on the popular arts the author reviews the basic legal principles involved copyright trademark unfair competition and contract law and analyzes their applications to fictional characters In addition to tracing the evolution of the law relating to the protection of fictional characters Howell explores the feasibility of isolating characters and protecting them via stringent copyright and or trademark laws addresses character merchandising and the associated legal issues and suggests legal reforms aimed at protecting the creator Detailed case information serves both to

illustrate the legal principles and actions discussed and to stand as a model for the proprietors of future characters Divided into two major sections the volume begins by offering a comprehensive introduction to intellectual property law Specific topics addressed include basic concepts of property statutory protection of intellectual property elements of an infringement action defenses to copyright infringement unfair competition and the application of trademark principles to literary properties In the second section Howell analyzes the extent to which the fictional character is legally regarded as intellectual property She reviews situations in which copyright and trademark law have been invoked to protect the creator of a fictional character examines cases involving such well known characters as the Lone Ranger Superman and the crew of the Starship Enterprise and presents an extended analysis of the case of Tarzan Finally Howell considers whether right of publicity and merchandising offer additional protection for fictional characters In the concluding chapter she offers an analysis of copyright decisions and a proposal for their reconciliation Both practicing attorneys and students of entertainment law will find Howell s work an important contribution to the professional literature
