**Garments of Paradise** Susan Elizabeth Ryan, 2014-06-13 A historical and critical view of wearable technologies that considers them as acts of communication in a social landscape Wearable technology whether a Walkman in the 1970s an LED illuminated gown in the 2000s or Google Glass today makes the wearer visible in a technologically literate environment Twenty years ago wearable technology reflected cultural preoccupations with cyborgs and augmented reality today it reflects our newer needs for mobility and connectedness In this book Susan Elizabeth Ryan examines wearable technology as an evolving set of ideas and their contexts always with an eye on actual wearables on clothing dress and the histories and social relations they represent She proposes that wearable technologies comprise a pragmatics of enhanced communication in a social landscape Garments of paradise is a reference to wearable technology's promise of physical and mental enhancements Ryan defines dress acts hybrid acts of communication in which the behavior of wearing is bound up with the materiality of garments and devices and

focuses on the use of digital technology as part of such systems of meaning. She connects the ideas of dress and technology historically in terms of major discourses of art and culture and in terms of mass media and media culture, citing such thinkers as Giorgio Agamben, Manuel De Landa and Gilles Deleuze and Félix Guattari. She examines the early history of wearable technology as it emerged in research labs, the impact of ubiquitous and affective approaches to computing interaction design and the idea of wearable technology as a language of embodied technology and the influence of open source ideology. Finally, she considers the future as wearing technologies becomes an increasingly naturalized aspect of our social behavior.

*Wearable Objects and Curative Things* Dawn Woolley, Fiona Johnstone, Ellen Sampson, Paula Chambers, 2023-11-28. This book explores the intersections between wearable objects and human health with particular emphasis on how artists and designers are creatively responding to and rethinking these relations. Addressing a rich range of wearable artefacts from mobility aids and prosthetics to clothing and accessories to digital health tracking devices, its themes include care and cure, wellness culture and the commoditization of health and the complex interactions between human bodies and non-human objects. With a theoretical framework inspired by the work of materialist thinkers including Sherry Turkle, Bruno Latour and Jane Bennett and bringing the disciplinary fields of fashion studies, art and design practice and medical and health humanities into dialogue for the first time, this volume draws attention to the complex agencies entangled in the things we wear and situates fashion and art in relation to broader cultural and historical contexts of health, illness and disability.

*Fashion: Exploring Critical Issues*, 2020-05-18. This ebook is an interdisciplinary collection of topics representing conventional and unconventional approaches to fashion studies, exposing a wide variety of methodological perspectives from fields including anthropology, history, art history, sociology and material culture. **Crafting Textiles in the Digital Age** Nithikul Nimkulrat, Faith Kane, Kerry Walton, 2016-09-08. In an era of increasingly available digital resources, many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies. Highly specialized craft design practitioners may now elect to make use of digital processes in their work but often choose not to abandon craft skills fundamental to their practice and aim to balance the complex connection between craft and digital processes. The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands on experimentation with material and digital technologies available in the present. Craft provides the foundations for thinking within the design and production of textiles and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies. Within the framework of current challenges relating to sustainable development, globalization and economic constraints, it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner. **Mode en verbeelding** Jos Arts, 2009.
