Cancer Supportive Care Ernest H. Rosenbaum, Isadora R. Rosenbaum, 1998 **Issues in Supportive Care of Cancer**

Patients Donald J. Higby, 2012-12-06 **Supportive Care in Cancer Patients** Hans-Jörg Senn, Agnes Glaus, Luzius Schmid, 2012-12-06 The symposium on supportive care in cancer patients which took place in St Gallen Switzerland on February 18 21 1987 welcomed renowned experts in the field and more than 600 participants from 25 countries with the aim of stimulating discussion on how to improve our professional skills and personal attitudes to ward cancer patients in all stages of their disease. Why did we organize such a symposium on supportive care in cancer patients? Recent decades have witnessed remarkable success in cancer treatment and we have learned how to cure a finite number of neoplastic diseases. Some malignant tumors that previously entailed high fatality rates such as leukemias lymphomas and testicular cancers can now be cured even when at an advanced stage. Yet it seems to many that our struggle to improve results and to fight death from cancer has also imposed greater toxicity on patients. Conventional scientifically based oncology has only recently made adequate efforts to improve the subjective quality of life of cancer patients for example through prophylaxis against emesis nausea and scalp hypothermia pain control and the development of psychosocial support structures. The search for less toxic and yet equally effective treatment measures has not been one of our primary goals in the past. Supportive care has always been part of nurses professional aim even though many have not known how best to offer it. *Principles and Practice of Palliative Care and Supportive Oncology* Ann M. Berger, John L. Shuster, Jamie H. Von Roenn, 2007 The first truly interdisciplinary book on supportive oncology and palliative care returns with a new edition that serves as a practical guide to the management of the myriad symptoms and quality of life issues that occur in patients with cancer including newly diagnosed patients undergoing treatment cancer survivors and patients whose disease is no longer curable. The

interdisciplinary group of contributors includes leading experts in hospice care and palliative medicine oncology nursing neurology psychiatry anesthesiology and pharmacology This completely revised edition features new chapters on caregiver stress hepatic failure pulmonary failure research issues in palliative care and beginning a palliative care program Content has been aligned with the needs of today s palliative care fellowship programs and includes additional tables algorithms and flow charts

Supportive Care in Cancer Therapy

Donald J. Higby,1983-08-31 Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good indepth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more
