This study sets out to examine the relationship between Paul Tillich's courage to be and Rollo May's courage to create It examines the concerns of the existentialists whose predicament will foreshadow the overarching problems in May's and Tillich's time The study examines being the negation of being and anxiety as a connection in Tillich's and May's thought It seeks to understand the human being at a point where theological philosophical and psychological realms converge Based on May's description of the

creative encounter this thesis proposes that May's courage to create exemplifies Tillich's courage to be. Where a split has occurred between humankind's perception of itself and its world this thesis offers that the courage to create expresses a reconciliation between the two which can help to quell the threats of nonbeing anxiety against one's self affirmation. What this analysis finds is that during creative process one affirms himself in such a way as to promote his fuller being both as an individual and as a part of a greater whole. This thesis examines self affirmation by creative encounter and finds that this engagement shows a unitive relationship between one's self and one's world as is represented by the philosophical notion being in the world. The thesis also examines the characteristics of the creative person which should provide other persons who replicate those tendencies to experience more meaningfully their world. The thesis offers that if one harnesses a creative attitude he will find himself more engaged more unified more whole more his true self more human and more capable of perceiving the meaningful. *Summary of Rollo May's The Courage to Create* Everest Media, 2022-05-15T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 We are living in an age of limbo where one age is dying and the new age is not yet born. We cannot ignore the changes in sexual mores marriage styles family structures education and religion 2 Courage is the foundation that underlies and gives reality to all other virtues. It is not a virtue or value among other personal values like love or fidelity. It is the basis that underlies and gives reality to all other virtues 3 The most simple and obvious form of courage is physical. We need a new form of physical courage that will neither run rampant in violence nor require our assertion of egocentric power over other people 4 Moral courage is the second type of courage. It is the courage to stand up for what is right even if it means standing alone. It is based on one's capacity to perceive the suffering of others and it arises from compassion for that suffering. Singer-Songwriters of the 1970s Robert McParland, 2022-08-24 The 1970s saw a wave of singer songwriters flood the airwaves and concert halls across the United States. This book organizes the stories of approximately 150 artists whose songs created the soundtrack to people's lives during the decade that forever shaped musical composition.
