Rather than lament the situation this book offers a solution an original model for mental health diagnosis Drawing on complexity theory and biology the approach generates a practical road map guiding a practitioner to discover the dimension of origin of a mental health issue rather than seek the closest match to the symptoms in the quasi official doctors diagnostic manual DSM 5 Similar symptoms can have completely different origins ranging from microscopic molecular imbalances to society level pressures With the dimension of origin identified an effective treatment can be implemented The book will interest doctors therapists manual practitioners and others and give hope to mental health patients their loved ones and their carers especially those struggling to find a solution for problems that respond neither to drugs nor talking therapies Mind Membrain is written for the lay person and includes personal case histories that bring the topic alive
