**Rural Transformations and Rural Policies in the US and UK** Mark Shucksmith, David L. Brown, Sally Shortall, Jo Vergunst, Mildred E. Warner, 2012-02-27 This book examines the transformations of rural society and economy in the UK and US during the last half century and explores the significance of these trends and changes for community sustainability

quality of life and the environment While both the UK and US are highly urbanised rural people and communities continue to contribute to national identity economic development and social solidarity as well as to environmental quality Contributors explore the degree to which rural people exhibit agency and autonomy rather than being merely passive in the face of exogenous forces of change in a globalised world They also illuminate very different policy approaches to rural policy in two advanced capitalist societies often thought to be similar and show how fundamental differences in rural policy approaches of the US and the UK are based on different social ideologies and values that shape policies relating to rural areas This book will help to stimulate transatlantic dialogue on rural scholarship and rural policy analysis while also contributing to theory and policy development It will be of interest to researchers students and everyone involved in the policy and practice of rural development **The Political Reconstruction of American Tobacco, 1862-1933** Patrick Mulford O'Connor, 2025-06-03

A deeply researched and clearly argued account of the mutual growth of the federal government and the modern tobacco Nearly everything about the United States tobacco economy changed in the generation following the American Civil War From labor to consumption manufacturing to regulation tobacco was utterly reconstructed comparatively a new industry as one contemporary wrote The Political Reconstruction of American Tobacco 1862 1933 exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative Through a detailed rendering of tobacco s late nineteenth century political economy this book argues that the federal state s and American capitalism s development were mutually constitutive and fundamentally political processes From the Civil War to the Progressive Era diverse political movements across tobacco s commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco s reconstruction The Political Reconstruction of American Tobacco 1862 1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system the increasingly influential fertilizer producers and warehouse operators who determined tobacco s value and the crop scientists who sought to promote and rationalize US tobacco production As these actors reshaped tobacco s commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South The ruling logic of tobacco s reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862 1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty

The Rural Midwest Since World War II Joseph Leslie Anderson,2014 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own
