The Critical Seventies Architecture And Urban Planning In The Netherlands 1968198:

Critical seventies Martien de Vletter,2004 There is no period in the history of the Netherlands which excites such emotion resistance or aversion as the decade of the 1970s Following in the wake of the democratization wave of 1968 some regard the 1970s as a period when pluralism was possible and desirable at all levels For others the crowning moment of 1968 degenerated into a quagmire of public consultation and a culture of always inconclusive committee meetings The 70s were either hip and groundbreaking or dogmatic and rigid The architecture of the time which headed off in pursuit of new definitions and forms is similarly divisive Though a number of architectural trajectories were driven by a devoted social engagement and a profound belief in architecture as a means of molding society the sheer plethora of movements failed to generate a single and unanimous alternative resulting instead in polarization and pluralism The Critical Years focuses on architecture urban planning and spatial planning from 1968 to 1982 Specific projects from the period are discussed and extensively documented on the basis of six themes and an introductory essay considers the context in which building and planning changed so radically With the imminent demolition and renovation of much of the infrastructure and architecture of the 1970s this book is a critical and timely document of one of the most important periods for architecture in the Netherlands

Constructing the Netherlands Marc A. Visser,2006 Visies op tien grote architectuurprojecten zoals Deltametropool routeontwerp A12 en het nieuwe Rijksmuseum te Amsterdam Builders and Planners Jos Arts,Ruud Filarski,Hans Jeekel,Bert Toussaint,2016 This book looks at the intersection of Dutch infrastructure builders and Dutch spatial planners both of whom have historically desired to order Dutch space From the professionalization of builders and planners in the

1920s when they first sought to leave their mark on the design of the land to the subsequent transition from urban to regional and national spatial planning and the groups increasingly public roles in the 1950s and 60s Builders and Planners is a story of collaboration and conflict of coalitions and opposition between two expert groups working in the Dutch space Also including case studies of particular construction projects that shed light on the difficult path from plan to completion as well as offering insight into the unique nature of planning in the Netherlands through detailed comparison with Belgium Builders and Planners provides new and fascinating perspectives on the history of Dutch planning and planners *The Legacy of CIAM in the Netherlands: Continuity and Innovation in Dutch Housing Design* Susanne Komossa, Martin Aarts, 2019 Abstract This article discusses how CIAM Congrès Internationaux d'Architecture Moderne influenced Dutch housing and urban planning. It starts by looking at programs and policies of the 1920s and 1930s Dutch housing design and the way in which the new ideas of CIAM were there incorporated. In this history the design of the AUP (Algemeen Uitbreidingsplan) Amsterdam or the General Extension Plan is crucial marking the transition into a new spatial model for large scale housing areas. CIAM thinking and its successor TEAM X strongly influenced the idea of the social cultural city before and directly after WWII. This becomes evident in the urban extensions of Amsterdam and Rotterdam. This practice influenced urban planning and housing design and culminated during the 1970s in the design of the Bijlmermeer. Though legendary and still detectable in the urban developments of Amsterdam and Rotterdam CIAM thinking came forward as both visionary and problematic. This article will trace the CIA Post-War Reconstruction in the Netherlands 1945-1965 Anita Blom, Simone Vermaat, Ben Vries, 2017-01-24 In the wake of the destruction of World War Two the Netherlands bombed cities and villages reemerged from the rubble and new buildings and infrastructure appeared thanks to central management. This book documents and celebrates the huge feat accomplished in the 20 years after the war examining its significance for current tasks of transformation and rezoning.
