The Crypto Controversy A Key Conflict In The Information Society Law And Electronic Commerce:

The Crypto Controversy:A Key Conflict in the Information Society Bert-Jaap Koops,1999-01-01 Cryptography is essential for information security and electronic commerce yet it can also be abused by criminals to thwart police wiretaps and computer searches How should governments address this conflict of interests Will they require people to deposit crypto keys with a trusted agent Will governments outlaw cryptography that does not provide for law enforcement access This is not yet another study of the crypto controversy to conclude that this or that interest is paramount This is not a study commissioned by a government nor is it a report that campaigns on the electronic frontier The Crypto Controversy is neither a cryptography handbook nor a book drenched in legal jargon The Crypto Controversy pays attention to the reasoning of both privacy activists and law enforcement agencies to the particulars of technology as well as of law to solutions offered both by cryptographers and by governments Koops proposes a method to balance the conflicting interests and applies this to the Dutch situation explaining both technical and legal issues for anyone interested in the subject

Trust in Electronic Commerce:The Role of Trust from a Legal, an Organizational, and a Technical Point of View

J. E. J. Prins,P. M. A. Ribbers, Henk C. A. Van Tilborg,2002-07-03 Electronic commerce is here to stay No matter how big the dot com crisis was or how far the e entrepreneurs shares fell in the market the fact remains that there is still confidence in electronic trading At least it would appear that investors are confident in e companies again However not only trust of venture capitalists is of importance consumers also have to have faith in on line business After all without consumers there is no e business Interacting lawyers technicians and economists are needed to create a trustworthy electronic commerce environment To achieve this environment thorough and inter disciplinary research is required and that is exactly what this book is about Researchers of the project Enabling Electronic Commerce from the Dutch universities of Tilburg and Eindhoven have chosen a number of e topics to elaborate on trust from their point of view This volume makes clear that the various disciplines can and will play a role in developing conditions for trust and thus contribute to a successful electronic market
