Hemispheric Imaginations Helmbrecht Breinig, 2016-12-06

What image of Latin America have North American fiction writers created, found or echoed and how has the prevailing discourse about the region shaped their work? How have their writings contributed to the discursive construction of our southern neighbors and how has the literature undermined this construction and added layers of complexity that subvert any approach based on stereotypes? Combining American Studies, Canadian Studies, Latin American Studies and Cultural Theory, Breinig relies on long scholarly experience to answer these and other questions. **Hemispheric Imaginations** is an ambitious interdisciplinary study of literary representations of Latin America as encounters with the other is among the most extensive such studies to date. It will appeal to a broad range of scholars of American Studies.

[A Historical Geography of Christopher Columbus's First Voyage and his Interactions with Indigenous Peoples of the Caribbean](#) Al M. Rocca, 2024-05-02

This book offers a unique account of Christopher Columbus's first voyage, the most consequential voyage in world history. It provides a detailed day-by-day account of the explorer's travels and activities, richly illustrated with thematic maps. This work expands our understanding of Columbus's first voyage by mapping his sea and land experiences, offering both a historical and geographical exploration of his first voyage.

Traveling chronologically through events, the reader builds a spatial insight into Columbus's perspectives that confused and confirmed his pre-existing notions of Asia and the Indies, driving him onward in search of new geographic evidence. Drawing from a diverse range of primary and secondary historical resources, this book is beautifully adorned with illustrations that facilitate an in-depth exploration of the connections between the places Columbus encountered and his subsequent social interactions with Indigenous people. This methodology allows the reader to better understand Columbus's actions as he analyzes new geographic realities with pre-existing notions of the Indies.

Attention is given to Columbian primary sources which analyze how those materials have been used to create a narrative by historians. Readers will learn about the social and political structures of the Lucayan, Ta'no, and Carib peoples, achieving a deeper understanding of those pre-Columbian cultures at the time of contact. The book will appeal to students and researchers in the disciplines of history, geography, and anthropology, and the general reader interested in Columbus.
