Small Houses Nicolas Pople, 2003 *Small houses are no longer synonymous with cheap houses and lack of privilege. Instead they symbolize a range of culturally coded values: compactness, efficiency, discrimination, discreteness, minimalism.* Opening with a detailed exploration of the social and historical background behind compact housing in the twentieth century, this book goes on to feature 37 illustrated case studies that represent some of the best examples of small houses built worldwide within the past decade. Plan areas range from 7 to 150 square metres / 75 to 1615 square feet and each project embodies a particular design approach towards compact accommodation. The case studies are organized into three chapters: Rural Retreats, Urban and Suburban Bases, and Small Clusters and Multiples, and include work by such architects as Toyo Ito, Lacaton & Vassal, LOT EK and Kazuyo Sejima.
