Robert Worley,2011-12-08 After four decades of relative stability in national security strategy

American behavior has been erratic in search of a new and sustainable role on the world stage Rather than facing an ideologically driven great power alliance the new threat appears to be emanating from failed or failing states And rather than preparing to deter and if necessary defeat a military super power the United States has entered into long costly and uncertain nation building efforts that are falling out of favor with the American public facing a deep recession Nation building efforts in Iraq and Afghanistan have exposed an imbalance in the capabilities of the departments and agencies and an inability to achieve a unity of effort a whole of government effort High level commissions recommend a reallocation of resources to achieve a new balance in the instruments of power and major reorganizations to affect a better orchestration of the instruments Others are completely redefining national security Traditionally threats to national security were military problems with military solutions What were considered issues of foreign policy including pandemics and environmental degradation are increasingly cast as national security matters They are not military problems with military solutions A national security strategy aligns ends ways and means Finding a new alignment must take place in an environment of a deep and wide recession partisan gridlock and uncertainty about the very meaning of national security This book presents the reader with the information necessary to engage in an informed debate on national security strategy and the system that supports it

book analyses the ways in which foreign policy actors in Asia have responded to the emerging great power conflict between the US and the People's Republic of China focusing on medium and small states across the Indo Pacific. The book offers a much needed counterpoint to existing analyses on the Indo Pacific and China's BRI and presents a new perspective by examining how great power politics are locally reinterpreted, conditioned or at times even contested. It illustrates the policy level challenges which the US-China rivalry poses for established political and economic practices and outlines how these challenges can be best addressed by smaller states and their societies. A timely assessment of the power play in the Indo Pacific with the angle of Sino-American rivalry, this book makes an important contribution to the study of Political Science, International Relations, Asian Studies and Security Studies. Tajikistan in the New Central Asia Lena Jonson, 2006-08-25

Central Asia has become the battleground for the major struggles of the 21st century: radical Islam versus secularism, authoritarianism versus identity politics, Eastern versus Western control of resources and the American War on Terror. Nowhere are these conflicts more starkly illustrated than in the case of Tajikistan. Embedded in the oil-rich Central Asian region and bordering war-torn Afghanistan, Tajikistan occupies a geo-strategically pivotal position. It is also a major transit hub for the smuggling of opium which eventually ends up in the hands of heroin dealers in Western cities. In this timely book, Lena Jonson examines Tajikistan's search for a foreign policy in the post-9/11 environment. She shows the internal contradictions of a country in every sense at the crossroads, reconciling its bloody past with an uncertain future. She assesses the impact of regional developments on the reform movement in Tajikistan and in turn examines how changes in Tajik society, which is the only Central Asian country to have a legal Islamist party, might affect the region. The destiny of Tajikistan is intimately connected with that of Central Asia and this thorough and penetrating book is essential reading for anyone seeking to make sense of this complex and important region.

The Dialectics of Small States Asbed Kotchikian, 2008

This book focuses on the foreign policy-making processes in Armenia and Georgia in the 1990-2006 period but it also aims to survey, examine and critique the literature pertaining to the theory of small states by examining the way small states conduct foreign policy and adapt to changing international political systems. In four separate sections, the book analyzes the various concepts related to small states. Then it examines the political realities in the South Caucasus during the post-Cold War era, after which it focuses on the attempts of Armenia and Georgia to assert statehood and independence through foreign policy that is bound by limited political and military power. Finally, a discussion of Armenian-Georgian bilateral relations addresses the dynamics of small state interaction with each other, subsequently arguing that Real Politik and the burden of history hold Armenian and Georgian foreign policies hostage between them. In sum, the book offers an insight in understanding the perceptions that these two nations have towards various issues such as Western integration or relations with Russia and contributes to the larger understanding of societies.
