and adults change Adapting to all of these changes in relationships social contexts status and performance criteria can generate great stress feelings of rejection and anger at perceived or real failure Young people may be attracted to violent behaviour as a way of asserting their independence of the adult world and its rules as a way of gaining the attention and respect of peers as a way of compensating for limited personal competencies or as a response to restricted opportunities for success at school or in the community Good relationships with parents during childhood will help in a successful transition to adolescence but they do not guarantee it Understanding Behavior Disorders Douglas W. Woods,Jonathan Kanter,2007 Because traditional behaviorism overlooked function altering behavior processes that are critical to understanding many behavior disorders other theoretical models took the lead in the explanation of pathological human behavior Current trends in behavior analysis however account for these processes retuning behavior analysis to a strong position in this area of research This book presents a cogent and comprehensive theory of behavior disorders from a behavior analytic perspective *American Journal of Public Health* ,2004 Cognition and Addiction Marcus Munafò,I.
