Keywords: philosophy, pedagogy, modern science, development, higher education, education, teaching

The actuality of the subject: Learning and teaching Philosophy is one of the problems of education in today's world. Philosophical institutes all over the world have engaged in extensive and in-depth discussion and made some decisions with regard to this issue. The purpose to write philosophical books for children and expose them to philosophical ideas from childhood and youth was the most crucial of those decisions. Experience has shown that this problem is not so simple, though. Because even the most simplified written books do not capture the attention of children and young people, and they are not being fully mastered, if we exclude some works created in this field. For this reason, the teaching and learning of philosophy continue with the previous methods.

Method and methodology: The theoretical methodological basis of the research is the systematic, pedagogical, and structural-functional approach to the analysis of social reality, the main provisions of scientific and academic analysis, and the mutual analysis of local and international teaching methods. The methods used are firstly descriptive, then theoretical generalization, and conceptual approach.

Source database of research: Here is to learn and explain the methods and styles practised in the national and international pedagogical bases and main brainstorms in the education and teaching of philosophy and abstract subjects in general.

Conclusion: In general, the development path of nations is not always straight and smooth. This can be considered as a necessity of history. However, only those peoples who are confident in their own thinking, who are able to realize their existence and announce it to the world, can get out of the difficult moments of fate. For example, today the German people are almost known as the kings of philosophy. However, in the 19th century, Germany was in a deep crisis, and its thinkers saw this first and looked for solutions. Seeing the suffocating reality and gradually debased people of his time, Hegel was saying, *"German life cannot remain in its current state, because everything has lost all its strength, all its dignity, and has become something negative."* [1. p.25] The same process existed in Azerbaijan at the beginning of the 20th century: intellectuals mobilized and published journals and articles, calling and trying to save the people from superstition and ignorance, which had covered them like a disease. As a result, there was a high revival in all fields in Azerbaijan.

Teaching Problems And The Problems Of Teaching

Teaching Problems And The Problems Of Teaching:

Teaching Problems and the Problems of Teaching Magdalene Lampert, 2001 Provides examples of how students can benefit from individualized treatment while still gaining knowledge from group lessons and indicates how to teach timely lessons and know whom to call on for answers to questions

Teaching Problems and the Problems of Teaching, 2001 In this book an experienced classroom teacher and noted researcher on teaching takes us into her fifth grade math class through the course of a year Magdalene Lampert shows how classroom dynamics the complex relationship of teacher student and content are critical in the process of bringing each student to a deeper understanding of mathematics or any other subject She offers valuable insights into students and teaching for all who are concerned about improving the learning that happens in the classroom Lampert considers the teacher s and students work from many different angles in views large and small She analyzes her own practice in a particular classroom student by student and moment by moment She also investigates the particular kind of teaching that aims at engaging elementary school students in learning fundamentally important ideas and skills by working on problems Finally she looks at the common problems of teaching that occur regardless of the individuals subject matter or kinds of practice involved Lampert arrives at an original model of teaching practice that casts new light on the complexity in teachers work and on the ways teachers can successfully deal with teaching problems

Problems in Teaching and Learning Mathematics R. Yasoda, 2009

Role Performance Of Special Education Teachers: Problems And Prospects G.L. Reddy, 2005 Contents Introduction Review of Related Literature Methodology Results and Discussion Summary and Suggestions

Teaching Problem Students Jere Brophy, 2003-07-29 Focuses on how teachers and school practitioners can improve the academic skills attitudes and coping abilities of students with behavior and adjustment problems Presented are findings from the Classroom Strategy Study which identifies widely used classroom management strategies that work and those that don t work for addressing a wide range of specific challenges in the elementary and middle grades
