Technical Communication and the World Wide Web Carol Lipson, Michael Day, 2005-05-06 Over the past decade the World Wide Web has dramatically changed the face of technical communication but the teaching of writing has thus far altered very little to accommodate this rapidly changing context. *Technical Communication and the World Wide Web* offers substantial and broadly applicable strategies for teaching global communication issues affecting writing for the World Wide Web. Editors Carol Lipson and Michael Day have brought together an exceptional group of experienced and well known teacher scholars to develop this unique volume addressing technical communication education. The chapters here focus specifically on curriculum issues and the teaching of technical writing for the World Wide Web contributing a blend of theory and practice in proposing changes in curriculum and pedagogy. Contributors offer classroom examples that teachers at all levels of experience can adapt for their own classes. The volume provides comprehensive coverage of the technical

communication curriculum from the two year level to the graduate level from service courses to degree programs This volume is an important and indispensable resource for technical writing educators and it will serve as an essential reference for curriculum and pedagogy development in technical communication programs **Technical Communication** William Sanborn Pfeiffer,Kaye A. Design Thinking in Technical Communication Jason Tham, 2021-05-18 This book explicates the relationships between design thinking, critical making, and socially responsive technical communication. It leverages the recent technology-powered DIY culture called the Maker Movement to identify how citizen innovation can inform cutting-edge social innovation that advocates for equitable change and progress on today's wicked problems. After offering a succinct account of the origin and recent history of design thinking along with its connections to the design paradigm in writing studies, the book analyzes maker culture and its influences on innovation and education through an ethnographic study of three academic makerspaces. It offers opportunities to cultivate a sense of critical changemaking in technical communication students and practitioners, showcasing examples of socially responsive innovation and expert interviews that urge a disciplinary attention to social justice advocacy and an embrace of the design thinking principle of radical collaboration. The value of design thinking methodologies for teaching and practicing socially responsible technical communication are demonstrated as the author argues for a future in the field that sees its constituents as leaders in radical innovation to solve wicked social problems. This book is essential reading for instructors, students, and practitioners of technical communication and can be used as a supplemental text for graduate and undergraduate courses in usability and user-centered design and research.
