Political and

Economic Analysis of State-Owned Enterprise Reform Huiming Zhang,2021-07-29 In revisiting the forty year history of reforms to China's state owned enterprises SOE the book assesses the experiences of this process of reform and scrutinizes how this has helped advance the country's economy overall The author finds that China's SOE reform not only commits to institutional innovation within the corporation in terms of operating mechanisms management structure legal organization and the economic system of the enterprise but that it is also underpinned by a series of policies that highlight an increasing market orientation The measures have given rise to a benign interaction between enterprise reform and market development while switching the SOE's role from appendages of government organs under a planned economic system to more autonomous entities that integrate public ownership and the market economy In this regard SOE reform's success in constructing a modern enterprise system serves as the micro foundation and core of an improved socialist market economic system The book will appeal to academics and students interested in political economy and the Chinese economy with particular reference to SOE reform and the recent economic transition in China

Understanding Institutional

Shareholder Activism Bo Gong,2013-12-13 Institutional shareholder participation has long been considered as vital to good corporate governance yet its potential does not seem to have been realized The recent banking crisis exposed the passivity of some institutional shareholders many of whom appear to have chosen to sell their stakes in the banks rather than intervene or challenge the board when they realized the strategies followed by the banks were excessively risky Institutional shareholders role to scrutinize and monitor the decisions of boards and executive management in the banking sector in the UK is considered by many to be a failure resulting in the phenomenon of ownerless corporations as described by Lord Myners In China despite the fast rising of institutional investment in the securities market institutional shareholders have not yet played a contributory role in monitoring corporate managers in listed companies Drawing on empirical evidence this book seeks to systematically analyses institutional shareholders incentives to activism to explain when and why shareholder activism will occur The book puts forward a model which explains the factors that determine institutional shareholders propensity for activism The model both elaborates the collective benefits of activism as a means of achieving managerial accountability asks whether and when shareholder activism is rational for any individual shareholder The book then goes to on to apply these finding to both the UK and China in order to explain the varying levels of shareholder activism in each jurisdiction The book is the first to take an in depth look at institutional share holder activism in China providing prescriptions to promote greater shareholder engagement and exploring the potential it holds for improving corporate governance in the region

The Constitutional Corporation Stephen Bottomley,2007-01-01 This book argues that instead of

consigning shareholders to a passive role they should be given opportunities to be active members of corporations The ideas of accountability deliberation and contestability provide a valuable framework for assessing corporate structures and process and for encouraging greater shareholder participation

The Enlightened Shareholder Value Principle and Corporate Social

Responsibility Taskin Iqbal, 2021-07-07 The Enlightened Shareholder Value principle and Corporate Social Responsibility are areas of increasing academic and research interest However discussions on the ESV principle in relation to CSR are very limited

This book provides a critical analysis of the impact of the concept of ESV embedded in the Companies Act 2006 on CSR and explores the scope for reform Along with analysing existing empirical research it presents the findings of an empirical study conducted to determine whether the concept of ESV is capable of promoting or assisting CSR The book also examines whether implementing an ESV approach has had any impact on the CSR practices of multinational corporations that originate in the UK and operate in developing nations as in order to assess whether the ESV principle links to CSR both its domestic and international impact need to be considered This analysis was undertaken through the lens of a case study on the ready made garment industry in Bangladesh with some focus on the Rana Plaza factory disaster This study also assists in demonstrating the changes that need to be made to improve the current situation Lastly the book addresses the need for reform in the area and provides possible suggestions for reform This interdisciplinary book will be of great interest to students and scholars of corporate law corporate governance and business studies in general as well as policymakers NGOs and government departments in many countries around the world working in the fields of CSR sustainability and global supply chains
