**Concise Townscape** Gordon Cullen, 2012-09-10 This book pioneered the concept of townscape Townscape is the art of giving visual coherence and organization to the jumble of buildings streets and space that make up the urban environment It has been a major influence on architects planners and others concerned with what cities should look like **The Concise**

**Townscape** Gordon Cullen, 1976 *The Concise Townscape* Gordon Cullen, 1995 Townscape is the art of giving visual coherence and organisation to the jumble of buildings streets and spaces that make up the urban environment Its concepts were first developed by Gordon Cullen in *The Architectural Review* and were later embodied in the book *TOWNSCAPE* 1961 which instantly established itself as a major influence on architects planners and others concerned with what cities should look like Its interest however goes far beyond the professional sphere Some may see it as an important contribution to art and architectural history since for the first time it explores the fact that certain visual effects in the grouping of buildings were based on quite definable if often spontaneous aesthetic principles Others may find that it teaches them to appreciate as no other book has done what it is that makes a town work architecturally A third group may want to study it for Cullen s superb drawings of city scenery a skill at which he is the acknowledged master **The Concise Townscape** Gordon Cullen

(Architekt, Grossbritannien), 1971 **Visual Planning and the Picturesque** Nikolaus Pevsner, 2010 A previously unpublished work by Nikolaus Pevsner much of which was published as journal articles in the *Architectural Review* in the 1940s and 1950s during Pevsner s term as editor **Valences of Historiography** Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author s contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian s conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture s past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian s interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents *Valences of Historiography* offers a fresh take on architectural history that is useful for academics researchers and architecture students *The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of

The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard Le Corbusier, Lynch and Jacobs to more recent writings by Waldheim, Koolhaas and Sorkin. Following the widespread success of the first edition of The Urban Design Reader, this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today. The six-part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid-century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability and urban resiliency. The final part examines professional practice and current debates in the field where urban designers work: what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing and how they fit into the larger picture of the urban design field.

Consumptie en territorium François Claessens, 1999

*The City at Eye Level* Meredith Glaser, 2012

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis on the street level. Storefronts, first floor apartments and sidewalks are the most immediate and common experience of a city. These plinths are the ground floors that

negotiate between inside and outside the public and private spheres The City at Eye Level qualitatively evaluates plinths by exploring specific examples from all over the world Over twenty five experts investigate the design land use and road and foot traffic in rigorously researched essays case studies and interviews These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design but also the concerns of urban communities The editors have put together a comprehensive guide for anyone concerned with improving or building plinths including planners building owners property and shop managers designers and architects Cut and Paste Urban Landscape Mira Engler,2015-08-11 During the post war era the emerging consumer economy radically changed both the discourse and practice of architecture It was a time where architecture became a mainstream commodity whose products sold through mass media a time in which Thomas Gordon Cullen came to be one of Britain s best known twentieth century architectural draftsmen Despite Cullen s wide acclaim there has been little research into his life and work particularly his printed images and his methods of operation This book examines Cullen s drawings and book design and also looks into his process of image making to help explain his considerable popularity and influence which continues to this day It presents the lessons Cullen had to offer in today s design culture and practice and looks into the post war consumerist design strategies that are still used today **Gordon Cullen** David Gosling,1996-04-11 Over 300 works from one of Britian s key activists in post war urban design RIBA Journal Royal Institute of British Architects,1971 **Norman Foster** Norman Foster,David Jenkins,2002 The works of Norman Foster from 1993 2004 are the focus of this book the fifth instalment of a multi volume retrospective The text about each project is accompanied by colour photographs and detailed plans **The Architectural Review** ,2004 **All about Old Buildings** Diane Maddex,1985 **Greenspotting Haaglanden** Alexandra Branderhorst,2008 Greenspotting Haaglanden considers the meanings of green in Haaglanden the metropolitan region of The Hague The authors seek to define the landscape in terms of rhythm light feeling and mathematics This analysis is preceded by inspiring interviews with an artist an economist an art historian and writer a landscape architect and filmmaker in which the meaning of landscape is the common theme Greenspotting Haaglanden represents an experiential approach it describes how this approach was arrived at presents a fresh teaching methodology and demonstrates the value of interdisciplinarity Greenspotting Haaglanden is a powerful representation that will inspire many landscape professionals to look at landscape in a new way *EDRA; Proceedings of the Annual Environmental Design Research Association Conference* Environmental Design Research Association,2007 **Conservation and Change in Historic Towns** Elizabeth Patricia Dennison,Council for British Archaeology,1999 Many of Britain s conservation problems are shared by the rest of Europe and answers may therefore be found abroad The aim of this well presented volume is to address urban conservation issues and to suggest research directions for the future The introduction examines the relationship between conservation and change in towns and is followed by a number of case studies The first section discusses the urban heritage of Europe including

Scandinavian and German towns The second section examines the towns and buildings of Scotland from archaeological and conservation perspectives Conservation experiences across Europe are analysed in the third section including southern Germany Edinburgh York Dublin and Switzerland and the fourth section looks at the future of Scottish towns The twenty papers contain numerous diagrams and photographs which illustrate failures and successes in conservation as well as highlighting areas with great potential for future work      *EDRA38* Environmental Design Research Association.
