**Abstract:** Digital transformation of education is the focus and hot spot of education reform at present, and digital transformation will bring radical changes to the field of education and teaching. Foreign language teaching, because of its special characteristics, can receive more attention and changes, and can produce a process from quantitative to qualitative changes. How to make a good digital transformation of foreign language teaching is very important to promote foreign language teaching methods, innovation and application as well as to explore new teaching modes under digital conditions. Through the introduction of the current background and the research of the current situation at home and abroad, this paper elaborates the significance of digital transformation of foreign language teaching, and introduces the teaching scenarios, teaching contents and teaching forms under digital transformation respectively, and finally summarizes the current opportunities and challenges.

## 1. Introduction

Informatization and digitization are constantly changing every aspect of people's lives. With the support of technologies such as Internet+, big data, cloud computing, artificial intelligence and blockchain, people's production, life and way of thinking have undergone significant changes, which also profoundly affect the development of the education system. In 2021, Facebook founder Zuckerberg said that the metaverse was the next frontier and officially announced the company's name change to Meta<sup>[1]</sup>. Tech giant Microsoft also announced its full-scale entry into the metaverse, and the metaverse concept quickly swept the world. The year 2021 is also defined as the first year of the metaverse by the Internet, which has attracted great interest from governments, technology, finance, education and other fields. This also means that digital transformation has reached a whole new level, and a new digital era has opened up from now on.

Chinese Party Central Committee has made a series of important strategic plans around education modernization, digital China and digital transformation, and the 14th Five-Year Plan and the Long-Range Objectives Through the Year 2035 clearly put forward the following: to accelerate digital development, build a new advantage in digital economy<sup>[2]</sup>, collaborate To promote digitalization and industrial digital transformation, accelerate the pace of digital society construction, improve the level of digital government construction, create a good digital ecology, and build a digital China. In the future, China will promote the construction of a strong network, accelerate the construction of digital economy, digital society, digital

government, digital transformation of the overall drive production methods, and drive the overall economic development.

In December 2022, CPC Central Committee and State Council issued the Opinions on Building a Data Infrastructure System to Better Play the Role of Data Elements. The Opinions point out that the construction of the data foundation system is related to the overall situation of national development and security. In order to accelerate the construction of the data foundation system, give full play to the advantages of China's massive data scale and rich application scenarios, activate the potential of data elements, make stronger, better and bigger digital economy, enhance the new momentum of economic development, and build a new national competitive advantage, relevant opinions are put forward.

In the field of foreign language education, from education system, organization form, teaching mode and learning paradigm, all of them are facing the challenges of brand new development in the digital era, and it is urgent for universities to carry out digital reform and innovation. How to do the transformation from informatization to digitalization? What are the connotation and core of digital transformation in colleges and universities? The research on these questions will help to explore the essence of digital transformation of colleges and universities and correctly grasp the work focus and practice direction of digital transformation of colleges and universities in the future.

**Content-Based Instruction in Foreign Language Education** Stephen B. Stryker, Betty Lou Leaver, 1997-09-01 This book offers concrete and practical ideas for implementing content based instruction using subject matter rather than grammar through eleven case studies of cutting edge models in a broad variety of languages academic settings and levels of proficiency The highly innovative models illustrate content based instruction programs for both commonly and less commonly taught languages Arabic Croatian French German Indonesian Italian Russian Serbian and Spanish and for proficiency levels ranging from beginners to fluent speakers They include single teacher and multi teacher contexts and such settings as typical language department classrooms specialty schools intensive language programs and university programs in foreign languages across the curriculum All of the contributors are pioneers and practitioners of content based instruction and the methods they present are based on actual classroom experiences Each describes the rationale curriculum design materials and evaluation procedures used in an actual curriculum and discusses the implications of the approach for adult language acquisition      **The Context of Language Teaching** Jack C. Richards, 1985-04-26 This is an important collection of papers by a distinguished personality in the field Topics covered include second language acquisition syllabus design methodology and methods listening speaking vocabulary and grammar Issues in applied linguistics are summarised and presented with clarity and their practical implications explored thus making the vital connection between theory and practice in language teaching Language teachers and students of applied linguistics will find this collection contains a wide range of recent work in linguistics presented in a lucid and highly accessible form      *New Methodological Approaches to Foreign Language*

*Teaching* Thomas H. Schmidt, Laura Torres-Zúñiga, 2017-06-23 This volume explores how the traditional academic disciplines of linguistics translation literature and cultural studies can contribute to or be integrated into the teaching of a foreign language by means of innovative methodologies techniques and instruments The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition It then

examines the ways in which linguistics translation theory literature and cultural studies are brought into the foreign language classroom not just as objects of study but also as vehicles for language learning By presenting studies on four main foreign languages English Spanish French and German the collection offers to the foreign language profession an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level The text is a valuable resource for language teachers with a more philologically oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches

*Second and Foreign Language Learning Through Classroom Interaction* Joan Kelly Hall, Lorrie Stoops

Verplaetse, 2000-06-01 This volume brings together the current theoretical interest in reconceptualizing second and foreign language learning from a sociocultural perspective on language and learning with practical concerns about second and foreign language pedagogy It presents a set of studies whose focus is on the empirical description of particular practices constructed in classroom interaction that promote the learning of a second or foreign language The authors examine in detail the processes by which the learning of additional languages is accomplished in the interaction of a variety of classrooms and in a variety of languages Not only will the findings from the studies reported in this volume help to lay a foundation for the development of a more expansive sociocultural model of second and foreign language learning but on a more practical level they will help language educators in creating a set of principles for identifying and sustaining classroom interactional practices that foster additional language development The volume is distinguished in three ways Following a Vygotskian perspective on development the studies assume that language learning is a fundamentally pragmatic enterprise intrinsically linked to language use This breaks from a more traditional understanding of second and foreign language learning which has viewed learning and use as two distinct phenomena The importance of classroom interaction to additional language development is foregrounded The investigations reported in this book are distinguished by their methodological approach Because language learning is assumed to be a situated context sensitive and dynamic process the studies do not rely on traditional experimental methods for collecting and analyzing data but rather they involve primarily the use of ethnographic and discourse analytic methods The studies focus on interactional practices that promote second and foreign language learning Although a great deal of research has examined first language learning in classrooms from a sociocultural perspective little has looked at second and foreign language classrooms from such a perspective Thus there is a strong need for this volume of studies addressing this area of research Researchers teacher educators and graduate students across the fields of second and foreign language learning applied linguistics and language education will find this book informative and relevant Because of the programmatic implications arising from the studies it will also appeal to teacher educators and teachers of second and foreign languages from the elementary to the university levels
