[Both Sides of the Border](#) Linda Fernandez, Richard T. Carson, 2005-12-30 The Mexican United States border represents much more than the meeting place of two nations. Our border communities are often a line of first defense absorbing the complex economic, environmental, and social impacts of globalization that ripple through the region. In many ways our success or failure in finding solutions for the environmental, social, and economic issues that plague the region may well define our ability to meet similar challenges thousands of miles from the border zone. Border residents face the environmental security concerns posed by water scarcity and transboundary air pollution, the planning and infrastructure needs of an exploding population, the debilitating effects of inadequate sanitary and health facilities, and the crippling cycle of widespread poverty. Yet with its manifold problems, the border area remains an area of great dynamism and hope, a multicultural laboratory of experimentation and grass roots problem solving. Indeed, as North America moves towards a more integrated economy, citizen action at the local level is pushing governments to adapt to the driving forces in the border area by creating new institutional arrangements and improving old ones. If there is one defining feature of this ground up push for more responsive transboundary policies and institutions, it is a departure from the closed, formalistic models of the past to a more open, transparent, and participatory model of international interaction.

Migration, Borders and Education Jessica Gerrard, Arathi Sriprakash, 2020-05-21 This book brings together high quality international research which examines how migration and borders are experienced in education. It presents new conceptualisations of education as a border regime, demonstrating the need for closer attention to border thinking and diasporic and transnational analyses in education. We live in a time in which borders material and political are being reasserted with profound social consequences. Both the containment and global movement of people dominate political concerns and inevitably impact educational systems and practices. Providing a global outlook, the chapters in this book present in-depth sociological analyses of the ways in which borders are constituted and reconstituted through educational practice from a diverse range of national contexts. Key issues taken up by authors include immigration status and educational inequalities, educational inclusion and internal migration, curricula, nationalism and global citizenship education and labour, the educational experiences of refugees and the politics of refugee education, student migration and adult education, and nationalism, colonialism and racialization. This book was originally published as a special issue of *International Studies in Sociology of Education*.

Bye-gones, Relating to Wales and the Border Counties, 1878 [British Columbia's Borders in Globalization](#) Nicole Bates-Eamer, Helga Kristín Hallgrímsdóttir, 2021-11-24 This book is a case study collection examining the influences and functions of British Columbia's BC borders in the 21st century. British Columbia's Borders in Globalization examines bordering processes and the causes and

effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies
